## EXECUTIVE SUMMARY

This traffic and transport assessment (TTA) has been carried out by Jennings O'Donovan and Partners Limited. The purpose of the TTA is to determine the effects of the traffic generated by the proposed residential development at Cairns Road, Sligo on the public road network.

The proposed development will consist of a 74 unit residential development with landscaped grounds, vehicle and bicycle parking.

The residential development will be accessed from a proposed priority junction on the Cairns Road, the development junction will replace an existing residential access and an agricultural access.

The proposed development junction is currently located in a 60km/h speed limit zone. It is our understanding with Sligo County Council that proposed footpath/road re-alignment works will take place on Cairns Road in the near term to medium term and the current speed limit will be reduced to 50km/h as part of these works.

The proposed residential development is linked to Sligo City Centre and the surrounding area via an existing pedestrian footpath. The existing footpath network is to be upgraded as part of the proposed residential development boundary works, additional footpath and road upgrade works on the Cairns Road are scheduled to be carried out by Sligo County Council in the near to medium term.

Visibility splays of 65m (60 kph speed limit), in accordance with Design Manual for Urban Roads and Streets (DMURS) requirements are available in both directions at the proposed residential development junction on the Cairns Road.

During the AM peak hour, the proposed development will contribute 45 additional trips to the public road network, resulting in a total of 15 arrivals and 30 departures during this period.

During the PM peak hour, the proposed development will contribute 45 additional trips to the public road network resulting in a of 30 arrivals and 15 departures during this period.

The results of the traffic analysis show that the proposed residential development junction on the Cairns Road will operate within capacity in 2023 when the development is occupied and will continue to operate within capacity beyond 2038 fifteen years after the development has opened.

The results of the traffic analysis show that the existing junctions in the vicinity of the residential development have capacity to accommodate the additional traffic generated by the development.

Car and bicycle parking are provided for residents and visitors within the proposed development grounds.

The proposed residential development has been subject to an independent road safety audit.

## 1. INTRODUCTION

### Brief

Jennings O'Donovan & Partners Limited has been appointed by Novot Holdings Limited, to carry out a Traffic and Transport Assessment (TTA) to review the impact of traffic associated with a proposed housing development at Cairns Road Sligo. The TTA has been carried out to accompany the planning application as the development will generate turning movements on the public road network.

### Objectives

The objective of this report is to examine the traffic implications associated with the proposed residential development in terms of how traffic generated by the development integrates with the existing traffic in the area. The TTA will determine and quantify the volume of traffic generated by the development and the impact of the development traffic on the public road network. The TTA will examine the impact of the development on the Cairns Road development access junction, Pearse Road / Cairns Road signalised junction and the existing development junctions on the Cairns Road.

### Statement of Authority

This report has been prepared by Jennings O'Donovan & Partners Limited, Finisklin Sligo. Established in Sligo in 1950 Jennings O'Donovan & Partners Limited is a Clean Tech Company providing consulting engineering services in the areas of road design, renewable energy, civil and structural engineering, water supply, wastewater collection and treatment, environmental resource management and impact assessment and in the area of industrial and commercial development.

### Design References / Standards

The TTA for the proposed residential development has been based on the following technical documents:

- Sligo County Council Development Plan.
- Transport Infrastructure Ireland publications:
  - PE-PDV-02045 Traffic and Transport Assessment Guidelines.
  - PE-PAG-02017 Travel Demand Projections.
  - PE-PAG-02039, Expansion Factors for Short Period Traffic Counts.
  - Spatial Planning and National Roads.
  - Design Manual for Roads and Bridges.
  - Specification for Road Works.

- 
- Design Manual for Urban Roads and Streets - DMURS
  - Junctions 9 Traffic Analysis Software.

## Consultation with Local Authority

1.5

A Pre-Planning meeting has been held between the developer and Sligo County Council regarding the proposed development. A subsequent site meeting then took place to discuss the site entrance to the residential development and road upgrade works on the Cairns Road that are to be carried out by Sligo County Council in the vicinity of the proposed development. The meeting was conducted between Mark Forbes (JOD), Darren Gilsenan (JOD), Thomas Kerins (SCC) and Conor McCann (SCC) on Friday the 28<sup>th</sup> of February 2022.

It was agreed that pedestrian and cycling linkages will be provided between the proposed development to the existing Ard Cairn housing estate to the North. The proposed development includes a dedicated pedestrian/cycling link to the Ard Cairn estate which will provide further access Northwards towards Sligo City Centre.

It was also noted during the site meeting that it would not be feasible to provide future road linkages between the proposed development site and lands to the South West due to the ground level differences between the lands.

In the site meeting, it was conveyed by Sligo County Council that road upgrade works would be carried out on Cairns Road in the near to medium term adjacent to the proposed development. The proposed road upgrade works would include footpath works, vertical realignment of the existing road to remove an existing crest curve, public lighting, drainage and relocation of the existing 50km/h speed limit beyond the proposed site entrance. Following the Cairns Road upgrade works, it is our understanding that the proposed residential development junction will be located within the 50km/h speed limit zone.

Subsequent discussions with SCC confirmed that visibility splays of 65m (60 kph speed limit), in accordance with Design Manual for Urban Roads and Streets (DMURS) requirements are applicable and achievable at the proposed entrance location.

## 2. PROPOSED DEVELOPMENT

### 2.1 Site Location

The proposed residential development is located approximately 2.0km to the south of Sligo City Centre near Markievicz Park. The site of the proposed development consists of a single residential dwelling and a greenfield site which are currently used for residential and agricultural purposes. The location

of the proposed development site is shown in **Figure 1** and the location of the proposed site entrance is shown on **Plate 1**.

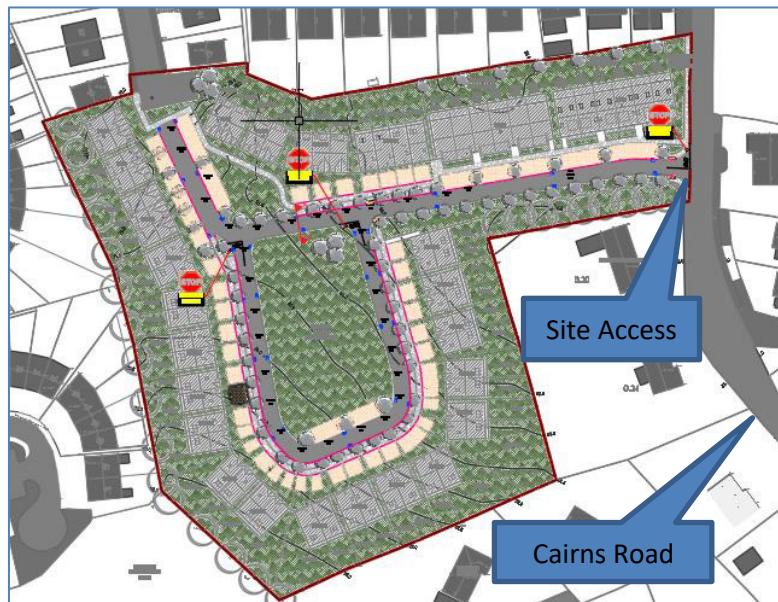

**Plate 1 – Site Location**

**Figure 1 – Site Location**

## 2.2 Proposed Development

The proposed residential development will consist of 74 residential units and will occupy an area of 2.1ha. The layout of the proposed residential development is shown in **Figure 2**.

**Figure 2 – Proposed Development Layout Plan**

### 3. EXISTING ROAD NETWORK AND TRAFFIC

#### 3.1 Existing Traffic Flows

In order to assess the impact of the proposed development on the existing road network when the residential development is constructed and fully occupied, baseline traffic volumes in the area are required. Jennings O'Donovan carried out classified traffic counts at the R287 Pearse Road / Cairns Road signalised junction and at the Cairns Road / Markievicz Road junction out on Tuesday 02<sup>th</sup> February between the hours of 7.30am and 9.15am in the morning and between 4.00pm and 6.00pm in the evening. The recorded traffic flows at the R287 Pearse Road / Cairns Road junction are summarised in **Table 1**.

|                    | Total Vehicles Through Junction |
|--------------------|---------------------------------|
| 7.30am to 7.45am   | 139                             |
| 7.45am to 8.00am   | 199                             |
| 8.00am to 8.15am   | 197                             |
| 8.15am to 8.30am   | 316                             |
| 8.30am to 8.45am   | 383                             |
| 8.45am to 9.00am   | 383                             |
| 9.00am to 9.15am   | 281                             |
|                    |                                 |
| 16.00pm to 16.15pm | 340                             |
| 16.15pm to 16.30pm | 361                             |
| 16.30pm to 16.45pm | 327                             |

|                    |     |
|--------------------|-----|
| 16.45pm to 17.00pm | 307 |
| 17.00pm to 17.15pm | 390 |
| 17.15pm to 17.30pm | 388 |
| 17.30pm to 17.45pm | 385 |
| 17.45pm to 18.00pm | 348 |

**Table 1 – R287 Pearse Road / Cairns Road Junction Traffic Flows**

Peak hour traffic periods for the public road network in the vicinity of the proposed residential development are obtained from the traffic count data shown in **Table 1**. The Traffic data shows that peak traffic occurs during the morning period between the hours of 8.15am and 9.15am and between the hours of 4.45pm and 5.45pm during the evening period. The peak hour periods shown in **Table 2** are used to carry out capacity analysis at the junction.

|              |               |
|--------------|---------------|
| AM Peak Hour | 8.15 – 9.15   |
| PM Peak Hour | 17.00 – 18.00 |

**Table 2 –Peak Hour Traffic Periods**

### **3.2 Proposed Residential Development Junction on Cairns Road**

Access to the proposed residential development will be from a new priority junction on the Cairns Road (Reference Plate 1), the development access will replace an existing residential access and a field access. The junction will consist of a simple T-junction with priority for Cairns Road traffic. Visibility at the proposed junction exceeds DMURS requirements for a junction located in a 60km/h speed limit zone. The junction will have visibility splays in excess of 65m measured in both directions from a setback distance of 2.4m from the Cairns Road carriageway edge. The development junction is lit by existing public lighting on the Cairns Road. The Cairns Road has a 6.0m wide carriageway and a raised pedestrian footpath which is to be upgraded as part of proposed residential development boundary treatment works which will connect to the existing Cairns Road footpath to provide a continuous link between the development and Sligo City Centre.

It is our understanding that the section of the Cairns Road in the vicinity of the development junction is to be improved by Sligo County Council. The Cairns Road improvement works would include footpath works, vertical realignment of the existing road to remove an existing crest curve, public lighting, drainage and extending of the existing 50km/h speed limit. Following the Cairns Road upgrade works, the proposed residential development junction is to be located within the 50km/h speed limit zone.

### 3.3 Existing R287 Pearse Road / Cairns Road Junction

The existing R287 Pearse Road / Cairns Road junction is a signalised T-Junction with pedestrian crossing points. The junction is located in a 50km/h speed limit zone and is lit by public lighting. The junction is marked with roadmarkings and is clearly signposted. No capacity issues or significant delays were observed at the junction during the traffic count period. Traffic analysis carried out at the junction show that the junction is operating within capacity and can accommodate development traffic. A summary of the traffic analysis is shown in **Figure 3**.

**Plate 2 – R287 Pearse Road / Cairns Road Junction**

|   | AM     |             |                 |           |      |     |                    |              | PM                         |        |             |                 |           |      |     |                    |              |                            |

**Figure 3 –Traffic Analysis - Existing Traffic Flows R287 Pearse Road / Cairns Road Junction**

### 3.4 Cairns Road / Markievicz Heights Junction

The existing Cairns Road / Markievicz Heights junction is a simple T-junction with priority for Cairns Road traffic. The junction is representative of the existing junctions on Cairns Road which will be impacted by traffic from the proposed residential development. The junction is located in a 50km/h speed limit zone and is lit by public lighting. The junction is marked by roadmarkings and signage. There is a raised pedestrian footpath with dropped kerbs and tactile paving at the junction.

No capacity issues or significant delays were observed at the junction during the traffic count period. Traffic analysis carried out at the junction shows that the junction is operating within capacity and can accommodate development traffic. The additional construction traffic generated during the construction of the proposed development will not adversely affect the capacity of existing junctions on Cairns Road. A summary of the traffic analysis is shown in **Figure 4**.

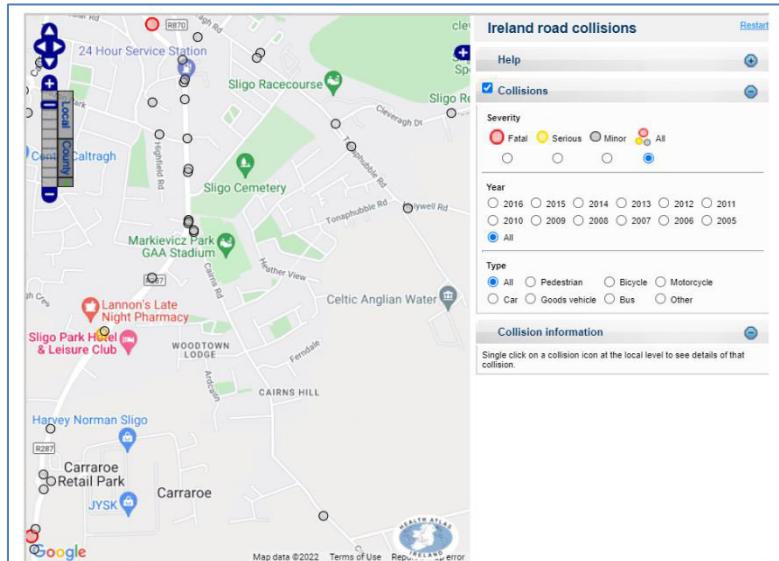

**Plate 3 – Cairns Road / Markievicz Heights Junction**

|  | AM     |             |                 |           |      |     |                    |              |                           | PM     |             |                 |           |      |     |                    |              |                           |

**Figure 4 –Traffic Analysis - Cairns Road / Markievicz Heights Junction**

### 3.5 Accident Data

Latest mapped statistics for accident data taken from the RSA website show that there were a number of minor accidents on the road network in the vicinity the proposed development. The accident data from the RSI website is shown in **Figure 5**.

**Figure 5 – Accident Data**

### 3.6 Parking Facilities

Car and bicycle parking facilities are provided within the grounds of the residential development. The parking spaces are provided in accordance with the requirements of the Sligo County Council Development Plan Table 13c.

### 3.7 Facilities for Pedestrians and Cyclists

The proposed residential development can be accessed from Sligo City Centre via the existing pedestrian footpath on Cairns Road. Pedestrian facilities on the Cairns Road will be upgraded as part of the residential development boundary treatment works and will connect to the existing Cairns Road footpath. The upgraded footpath will provide a continuous link between the development and the existing Sligo City footpath network. There is a pelican crossing located at the Pearse Road / Cairns Road signalised junction. There are no dedicated facilities for cyclists on the Cairns Road, cycle lanes are provided on the Pearse road. Bicycle parking facilities are provided at the development in accordance with SCC requirements set out in Table 13c of Development Plan.

### 3.8 Public Transport Accessibility of the Proposed Development

The proposed residential development is located 2.0km from Sligo City Centre near Markievicz Park. The development is located on Bus Route S1 which runs between Cairns Road and Carton via Sligo City Centre. The proposed residential development is located 400m from the nearest bus stop on Cairns Road. Sligo City is serviced by national and local bus services, rail and private taxi services.

## 4. TRAFFIC GENERATION AND TRIP DISTRIBUTION

### Trip Generation Associated with the Proposed Development

The proposed development will consist of a residential development. The development will consist of 74 residential units.

#### 4.1

The trip rates for the proposed development are based on published data for similar sized developments in Ireland which has been verified for the Sligo region by traffic counts carried out by JOD at the existing Willow Park development on the L61013 in Ballisodare and at Markievicz Heights in Sligo. Trip rates for residential units are shown in **Table 3**. The resultant trip rates for the proposed development are shown in **Table 4**. All trips to and from the development are analysed as new trips on the road network.

|              | Trip Rate<br>Arrivals (AM<br>Peak Hour) | Trip Rate<br>Departures<br>(AM Peak<br>Hour) | Trip Rate<br>Arrivals<br>(PM Peak<br>Hour) | Trip Rate<br>Departures (PM<br>Peak Hour) |
|--------------|---|--|--|---|
| Per Dwelling | 0.2                                     | 0.4  | 0.4  | 0.2                                       |

| 74 Units | 15   | 30   | 30   | 15  |

#### 4.2

**Table 4 – Trip Rates Generated by the Proposed Development**

### Traffic Distribution

The distribution of traffic generated by the proposed residential development to the public road network is based on recorded traffic flows taken at the Cairns Road / Markievicz Heights road junction and at the R287 Pearse Road / Cairns Road Junction during the morning and evening periods. During the morning period 95% of departures from the development will exit via the R287 Pearse Road / Cairns road Junction and 90% of arrivals to the development will approach from the Pearse Road via the signalised junction. During the evening period 90% of arrivals to the development will approach from the R287 Pearse Road /Cairns Road Junction. The distribution of development traffic for the purpose of the junction analysis is shown in **Table 5**.

|                                  | Arrivals         | Arrivals                | Departures     | Departures            |
|----------------------------------|------------------|-------------------------|----------------|-----------------------|
|                                  | From Pearse Road | From L3602 (Lough Gill) | To Pearse Road | To L3602 (Lough Gill) |
| AM Peak Hour Development Traffic | 13               | 2                       | 27             | 3                     |
| PM Peak Hour Development Traffic | 27               | 3                       | 13             | 2                     |

**Table 5 – Distribution of Development Traffic to the Public Road Network**

## 5. FUTURE TRAFFIC GENERATION

### 5.1 Future Traffic Growth on the Public Road Network

Traffic Infrastructure Ireland (TII) forecasts for future traffic growth on the public road network are published in PE-PAG-02017 “Travel Demand Projections”. The growth factors are applied to the baseline traffic flows to approximate the traffic flows on the public road network in the future when the development is opened in 2023, five years after opening in 2028 and fifteen years after opening in 2038. The growth factors for the relevant assessment years are shown in **Table 6**.

| Year | Growth Factor |
|------|---------------|
| 2022 | 1.0           |
| 2023 | 1.01          |
| 2028 | 1.07          |
| 2038 | 1.13          |

**Table 6 – Traffic Growth Factors for Public Roads**

### 5.2 Traffic Analysis of the Proposed Cairns Road / Residential Development Junction

A traffic analysis of the proposed residential development junction on the Cairns Road has been carried with the development in place to determine if the proposed junction will operate within capacity when the development is opened in 2023, five years after opening in 2028 and fifteen years after opening in 2038. The traffic analysis has been carried out using traffic volumes obtained from the traffic counts at the Cairns Road / Markievicz Heights junction. The results of the analysis show that the junction will not exceed the 0.85 ratio of flow to capacity (RFC) value during the AM or PM hours in 2023, 2028 and will continue to operate with reserve capacity beyond 2038. The ratio of flow to capacity (RFC) is calculated from Junctions 9 PICADY software. An RFC value of 1.0 indicates that the junction is operating at full capacity with a value of 0.85 considered to be the maximum RFC value after which the junction will begin to experience some capacity issues. The results of the analysis are summarized in **Figure 6**, full results from the analysis are included in **Appendix A**.

|   |        | AM          |                 |           |      |     |                    |              |                           | PM     |             |                 |           |      |     |                    |              |                           |

**Figure 6 – Traffic Analysis Summary for the Proposed Cairns Road / Residential Development Junction - Future Traffic Flows 2023, 2028 and 2038 With Proposed Development in Place**

### 5.3 Traffic Analysis of the R287 Pearse Road / Cairns Road Junction Without Proposed Development

In order to determine if the R287 Pearse Road / cairns Road junction has sufficient capacity to accommodate traffic volumes from the proposed residential development, a traffic analysis of the junction has been completed without the development in place. The results of the analysis show that the junction will not exceed the 1.0 Degree of saturation (DOS) value during the AM or PM hours in 2023, 2028 and would continue to operate within capacity beyond 2038 without the development in place. The Degree of Saturation (DOS) is calculated from Junctions 9 PICADY software. A DOS value of 1.0 indicates that the junction is operating at full capacity with a value of 0.85 considered to be the maximum RFC value after which the junction will begin to experience some capacity issues. The results of the analysis are summarized in **Figure 7**, full results from the analysis are included in **Appendix A**.

**Figure 7 – Traffic Analysis Summary for the Existing R287 Pearse Road / Cairns Road Junction - Future Traffic Flows 2023, 2028 and 2038 Without Proposed Development in Place**

## 5.4 Traffic Analysis of the R287 Pearse Road / Cairns Road Junction With Proposed Development in Place

A traffic analysis of the R287 Pearse Road / Cairns Road signalised Junction has been carried out with the proposed development in place and fully occupied to determine if the existing junction will operate within capacity when the development is opened in 2023, five years after opening in 2028 and fifteen years after opening in 2038. The results of the analysis show that the junction will not exceed the 1.0 Degree of saturation (DOS) value during the AM or PM hours in 2023, 2028 and will continue to operate within capacity beyond 2038 with the development in place. The Degree of Saturation (DOS) is calculated from Junctions 9 PICADY software. A DOS value of 1.0 indicates that the junction is operating at full capacity with a value of 0.85 considered to be the maximum RFC value after which the junction will begin to experience some capacity issues. The results of the analysis are summarized in **Figure 8**, full results from the analysis are included in **Appendix A**.

**Figure 8 – Traffic Analysis Summary for the Existing R287 Pearse Road / Cairns Road Junction - Future Traffic Flows 2023, 2028 and 2038 With Proposed Development in Place**

## 5.5 Road and Junction Improvements

Access to the proposed residential development will be from a new priority junction constructed on the Cairns Road, the junction will replace an existing field access. The layout of the proposed junction is shown on **Figure 9**. Although the proposed development entrance complies with current DMURS

recommendations with regard to footpath connectivity and visibility, it is our understanding, following discussions with Sligo County Council, that the existing Cairns Road is to be upgraded by Sligo County Council in the vicinity of the development entrance. The road upgrade works will include footpath works, realignment to remove existing crest in the vertical alignment and the relocation of the existing speed limit classification. The Sligo County Council upgrade works will improve safety, improve sightlines and reduce the speed limit from 60km/h to 50km/h at the proposed residential access.

## **Figure 9 – Proposed Development Junction**

## 6. SUMMARY

This transport assessment was carried out by Jennings O'Donovan and Partners Limited. The purpose of the TTA is to determine the effects of the traffic generated by the proposed residential development and associated junction on the public road network with the development opening and fully occupied in 2023, five years after opening in 2028 and fifteen years after opening in 2038.

- The proposed development will consist of a 74 unit residential development.
  - The residential development will be accessed from a proposed priority junction on the Cairns Road.
  - The proposed development junction is located in a 60km/h speed limit zone on the Cairns Road. Visibility splays of 65m will be available in each direction at the proposed residential junction on

Cairns Road in accordance with DMURS requirements for this 60km/h speed limit zone. It is our understanding that the existing 50km/h speed limit zone on Cairns Road is to be extended and will include the development junction following road improvement works which are scheduled to be carried out by Sligo County Council in the near to medium term.

- The location of the proposed development junction is lit by existing public lighting on the Cairns Road.
- The proposed development will be linked to Sligo City Centre and the surrounding area via the existing pedestrian footpath network.
- Pedestrian and cycling linkages will be provided between the proposed development and the existing Ard Cairn housing estate to the North. The proposed development includes a dedicated pedestrian/cycling path that will link the Ard Cairn estate and will provide a clear link Northwards towards Sligo City Centre via existing footpaths.
- During the AM peak hour, the proposed development will contribute 45 additional trips to the public road network, resulting in a total of 15 arrivals and 30 departures during this period.
- During the PM peak hour, the proposed development will contribute 45 additional trips to the public road network resulting in a of 30 arrivals and 15 departures during this period.
- The results of the traffic analysis show that the proposed residential development junction will operate within capacity in 2023 when the development is occupied and will continue to operate within capacity beyond 2038 fifteen years after the development has opened.
- The results of the traffic analysis show that the existing junctions in the vicinity of the residential development have capacity to accommodate the additional traffic generated by the development.
- Car and bicycle parking are provided for residents and visitors within the proposed development grounds.
- The proposed residential junction has been subject to an independent stage 1 road safety audit carried out by the CST group.

## 7. CONCLUSION

The traffic and transport assessment shows that the proposed residential development will generate turning movements at the development access junction with the Cairns Road and at the signalised junction between the Cairns Road and the Pearse Road. The traffic analysis carried out at the junctions shows that the traffic generated by residential development will not impact adversely on the public road network. The traffic analysis shows that the junction will operate within capacity when the development is opened in 2023, five years after opening in 2028, fifteen years after opening in 2038 and will cater for increased traffic growth on the public road network beyond 2038.

*There are warnings associated with one or more model runs - see the 'Data Errors and Warnings' tables for each Analysis or Demand Set.*

*Values shown are the highest values encountered over all time segments. Delay is the maximum value of average delay per arriving vehicle. Junction LOS and Junction Delay are demand-weighted averages. Network Residual Capacity indicates the amount by which network flow could be increased before a user-definable threshold (see Analysis Options) is met.*

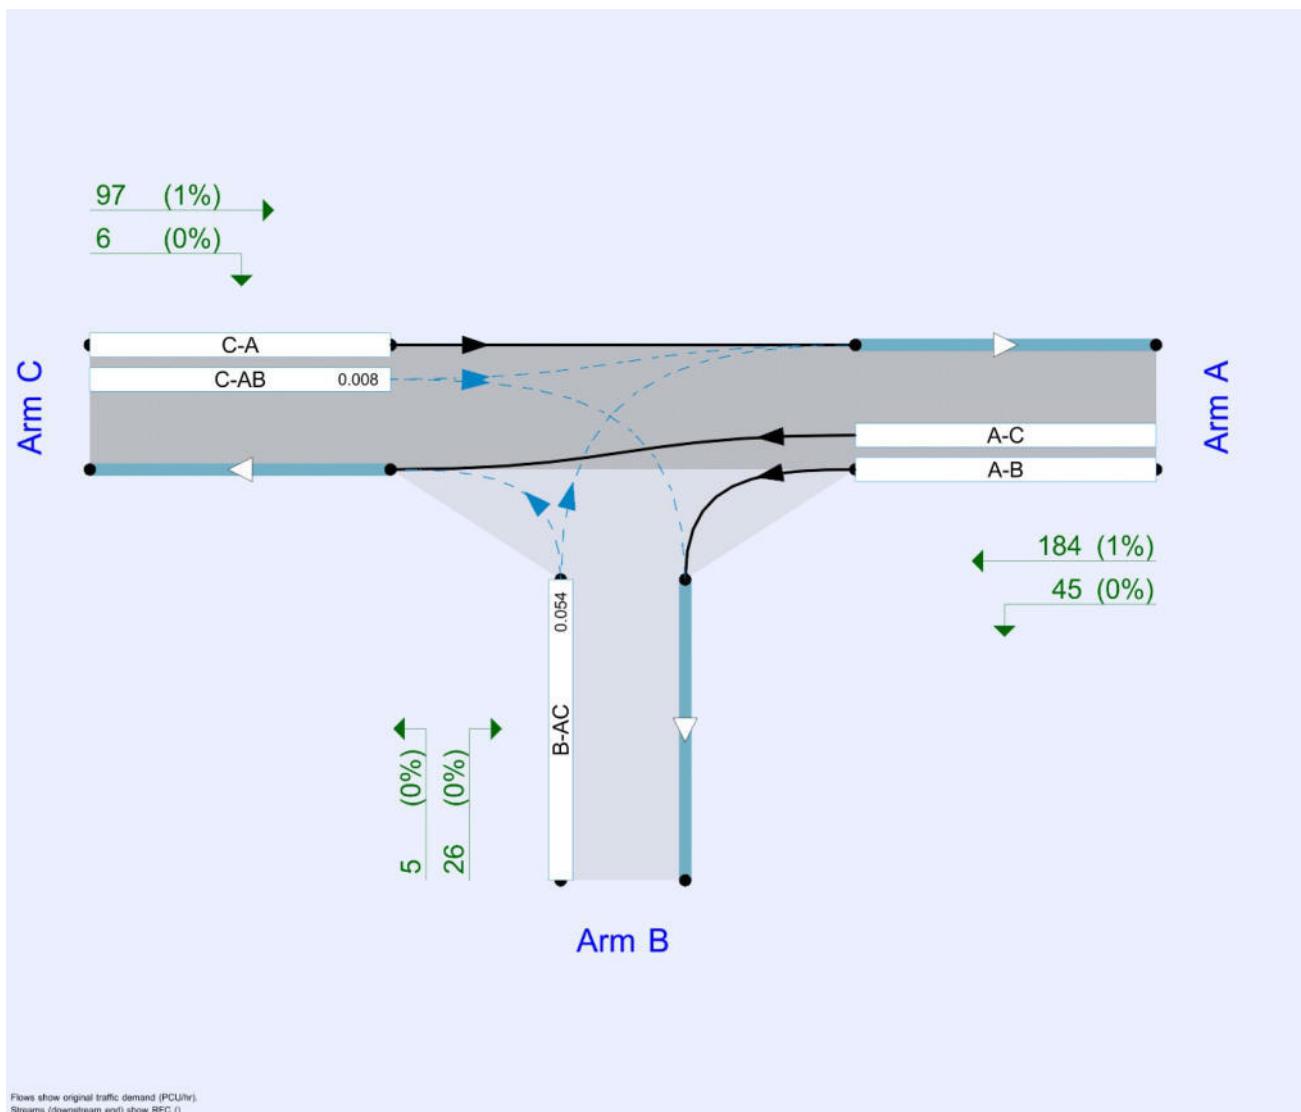

#### File summary

##### File Description

|             |                                  |
|-------------|----------------------------------|
| Title       | Cairns Road - Markievicz Heights |
| Location    | Sligo                            |
| Site number |                                  |
| Date        | 22/02/2022                       |
| Version     |                                  |
| Status      | (new file)                       |
| Identifier  |                                  |
| Client      |                                  |
| Jobnumber   |                                  |
| Enumerator  | JODIRELAND\jdoogan               |
| Description |                                  |

#### Units

| Distance units | Speed units | Traffic units input | Traffic units results | Flow units | Average delay units | Total delay units | Rate of delay units |
|----------------|-------------|---------------------|-----------------------|------------|---------------------|-------------------|---------------------|
| m              | kph         | PCU                 | PCU                   | perHour    | s                   | -Min              | perMin              |

### Analysis Options

| Calculate Queue Percentiles | Calculate residual capacity | Residual capacity criteria type | RFC Threshold | Average Delay threshold (s) | Queue threshold (PCU) |
|-----------------------------|-----------------------------|---------------------------------|---------------|-----------------------------|-----------------------|
| ✓                           | ✓                           | Delay                           | 0.85          | 36.00                       | 20.00                 |

### Demand Set Summary

| ID | Scenario name               | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|-----------------------------|------------------|----------------------|--------------------|---------------------|---------------------------|
| D1 | 2022 Existing Traffic Flows | AM               | ONE HOUR             | 08:00              | 09:30               | 15                        |
| D2 | 2022 Existing Traffic Flows | PM               | ONE HOUR             | 00:00              | 01:30               | 15                        |

### Analysis Set Details

| ID | Name                             | Network flow scaling factor (%) |
|----|----------------------------------|---------------------------------|
| A1 | Cairns Road / Markievicz Heights | 100.000                         |

# Cairns Road / Markievicz Heights - 2022 Existing Traffic Flows, AM

## Data Errors and Warnings

| Severity | Area             | Item             | Description  |
|----------|------------------|------------------|--|
| Warning  | Vehicle Mix      |                  | HV% is zero for all movements / time segments. Vehicle Mix matrix should be completed whether working in PCUs or Vehs. If HV% at the junction is genuinely zero, please ignore this warning. |
| Warning  | Queue variations | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high.  |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Major road direction | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|----------------------|-----------------------|--------------------|--------------|
| 1        | untitled | T-Junction    | Two-way              |                       | 1.32               | A            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | 255                           | Stream B-AC                  |

## Arms

### Arms

| Arm | Name               | Description | Arm type |
|-----|--------------------|-------------|----------|
| A   | Cairns Road North  |             | Major    |
| B   | Markievicz heights |             | Minor    |
| C   | Cairns Road South  |             | Major    |

### Major Arm Geometry

| Arm | Width of carriageway (m) | Has kerbed central reserve | Has right turn bay | Visibility for right turn (m) | Blocks? | Blocking queue (PCU) |
|-----|--------------------------|----------------------------|--------------------|-------------------------------|---------|----------------------|
| C   | 6.00                     |                            |                    | 50.0                          | ✓       | 0.00                 |

Geometries for Arm C are measured opposite Arm B. Geometries for Arm A (if relevant) are measured opposite Arm D.

### Minor Arm Geometry

| Arm | Minor arm type | Lane width (m) | Visibility to left (m) | Visibility to right (m) |
|-----|----------------|----------------|------------------------|-------------------------|
| B   | One lane       | 2.20           | 20                     | 20                      |

### Slope / Intercept / Capacity

#### Priority Intersection Slopes and Intercepts

| Stream | Intercept (PCU/hr) | Slope for A-B | Slope for A-C | Slope for C-A | Slope for C-B |
|--------|--------------------|---------------|---------------|---------------|---------------|
| B-A    | 454                | 0.083         | 0.209         | 0.132         | 0.299         |
| B-C    | 586                | 0.090         | 0.227         | -             | -             |
| C-B    | 603                | 0.234         | 0.234         | -             | -             |

The slopes and intercepts shown above do NOT include any corrections or adjustments.

Streams may be combined, in which case capacity will be adjusted.

Values are shown for the first time segment only; they may differ for subsequent time segments.

## Traffic Demand

### Demand Set Details

| ID | Scenario name               | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|-----------------------------|------------------|----------------------|--------------------|---------------------|---------------------------|
| D1 | 2022 Existing Traffic Flows | AM               | ONE HOUR             | 08:00              | 09:30               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 93                      | 100.000            |
| B   |            | ✓            | 45                      | 100.000            |
| C   |            | ✓            | 231                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From | To  |    |    |   |
|------|-----|----|----|---|
|      |     | A  | B  | C |
| A    | 0   | 21 | 72 |   |
| B    | 42  | 0  | 3  |   |
| C    | 226 | 5  | 0  |   |

## Vehicle Mix

### Heavy Vehicle Percentages

| From | To |   |   |   |
|------|----|---|---|---|
|      |    | A | B | C |
| A    | 0  | 0 | 0 |   |
| B    | 0  | 0 | 0 |   |
| C    | 0  | 0 | 0 |   |

## Results

### Results Summary for whole modelled period

| Stream | Max RFC | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|--------|---------|---------------|-----------------|---------------------------------|---------|
| B-AC   | 0.12    | 10.00         | 0.1             | 0.5                             | B       |
| C-AB   | 0.01    | 5.17          | 0.0             | 0.5                             | A       |
| C-A    |         |               |                 |                                 |         |
| A-B    |         |               |                 |                                 |         |
| A-C    |         |               |                 |                                 |         |

## Main Results for each time segment

**08:00 - 08:15**

| Stream | Total Demand (PCU/hr) | Capacity (PCU/hr) | RFC   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Unsignalised level of service |
|--------|-----------------------|-------------------|-------|---------------------|-----------------|-----------|-------------------------------|
| B-AC   | 34                    | 426               | 0.080 | 34                  | 0.1             | 9.170     | A                             |
| C-AB   | 5                     | 701               | 0.007 | 5                   | 0.0             | 5.169     | A                             |
| C-A    | 169                   |                   |       | 169                 |                 |           |                               |
| A-B    | 16                    |                   |       | 16                  |                 |           |                               |
| A-C    | 54                    |                   |       | 54                  |                 |           |                               |

**08:15 - 08:30**

| Stream | Total Demand (PCU/hr) | Capacity (PCU/hr) | RFC   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Unsignalised level of service |
|--------|-----------------------|-------------------|-------|---------------------|-----------------|-----------|-------------------------------|
| B-AC   | 40                    | 419               | 0.097 | 40                  | 0.1             | 9.507     | A                             |
| C-AB   | 6                     | 721               | 0.009 | 6                   | 0.0             | 5.038     | A                             |
| C-A    | 201                   |                   |       | 201                 |                 |           |                               |
| A-B    | 19                    |                   |       | 19                  |                 |           |                               |
| A-C    | 65                    |                   |       | 65                  |                 |           |                               |

**08:30 - 08:45**

| Stream | Total Demand (PCU/hr) | Capacity (PCU/hr) | RFC   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Unsignalised level of service |
|--------|-----------------------|-------------------|-------|---------------------|-----------------|-----------|-------------------------------|
| B-AC   | 50                    | 409               | 0.121 | 49                  | 0.1             | 9.998     | A                             |
| C-AB   | 8                     | 748               | 0.011 | 8                   | 0.0             | 4.867     | A                             |
| C-A    | 246                   |                   |       | 246                 |                 |           |                               |

# Cairns Road / Markievicz Heights - 2022 Existing Traffic Flows, PM

## Data Errors and Warnings

| Severity | Area             | Item             | Description   |
|----------|------------------|------------------|---|
| Warning  | Queue variations | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Major road direction | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|----------------------|-----------------------|--------------------|--------------|
| 1        | untitled | T-Junction    | Two-way              |                       | 0.93               | A            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | 284                           | Stream B-AC                  |

## Traffic Demand

### Demand Set Details

| ID | Scenario name               | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|-----------------------------|------------------|----------------------|--------------------|---------------------|---------------------------|
| D2 | 2022 Existing Traffic Flows | PM               | ONE HOUR             | 00:00              | 01:30               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 229                     | 100.000            |
| B   |            | ✓            | 31                      | 100.000            |
| C   |            | ✓            | 103                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From | To |   |    |     |
|------|----|---|----|-----|
|      |    | A | B  | C   |
|      | A  | 0 | 45 | 184 |
| B    | 26 | 0 | 5  |     |
| C    | 97 | 6 | 0  |     |

## Vehicle Mix

### Heavy Vehicle Percentages

| From | To |   |   |   |
|------|----|---|---|---|
|      |    | A | B | C |
|      | A  | 0 | 0 | 1 |
| B    | 0  | 0 | 0 |   |
| C    | 1  | 0 | 0 |   |

## Results

### Results Summary for whole modelled period

| Stream | Max RFC | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|--------|---------|---------------|-----------------|---------------------------------|---------|
| B-AC   | 0.08    | 9.59          | 0.1             | 0.5                             | A       |
| C-AB   | 0.01    | 5.93          | 0.0             | 0.5                             | A       |
| C-A    |         |               |                 |                                 |         |
| A-B    |         |               |                 |                                 |         |
| A-C    |         |               |                 |                                 |         |

### Main Results for each time segment

#### 00:00 - 00:15

| Stream | Total Demand (PCU/hr) | Capacity (PCU/hr) | RFC   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Unsignalised level of service |
|--------|-----------------------|-------------------|-------|---------------------|-----------------|-----------|-------------------------------|

There are warnings associated with one or more model runs - see the 'Data Errors and Warnings' tables for each Analysis or Demand Set.

Values shown are the highest values encountered over all time segments. Delay is the maximum value of average delay per arriving vehicle. Junction LOS and Junction Delay are demand-weighted averages. Network Residual Capacity indicates the amount by which network flow could be increased before a user-definable threshold (see Analysis Options) is met.

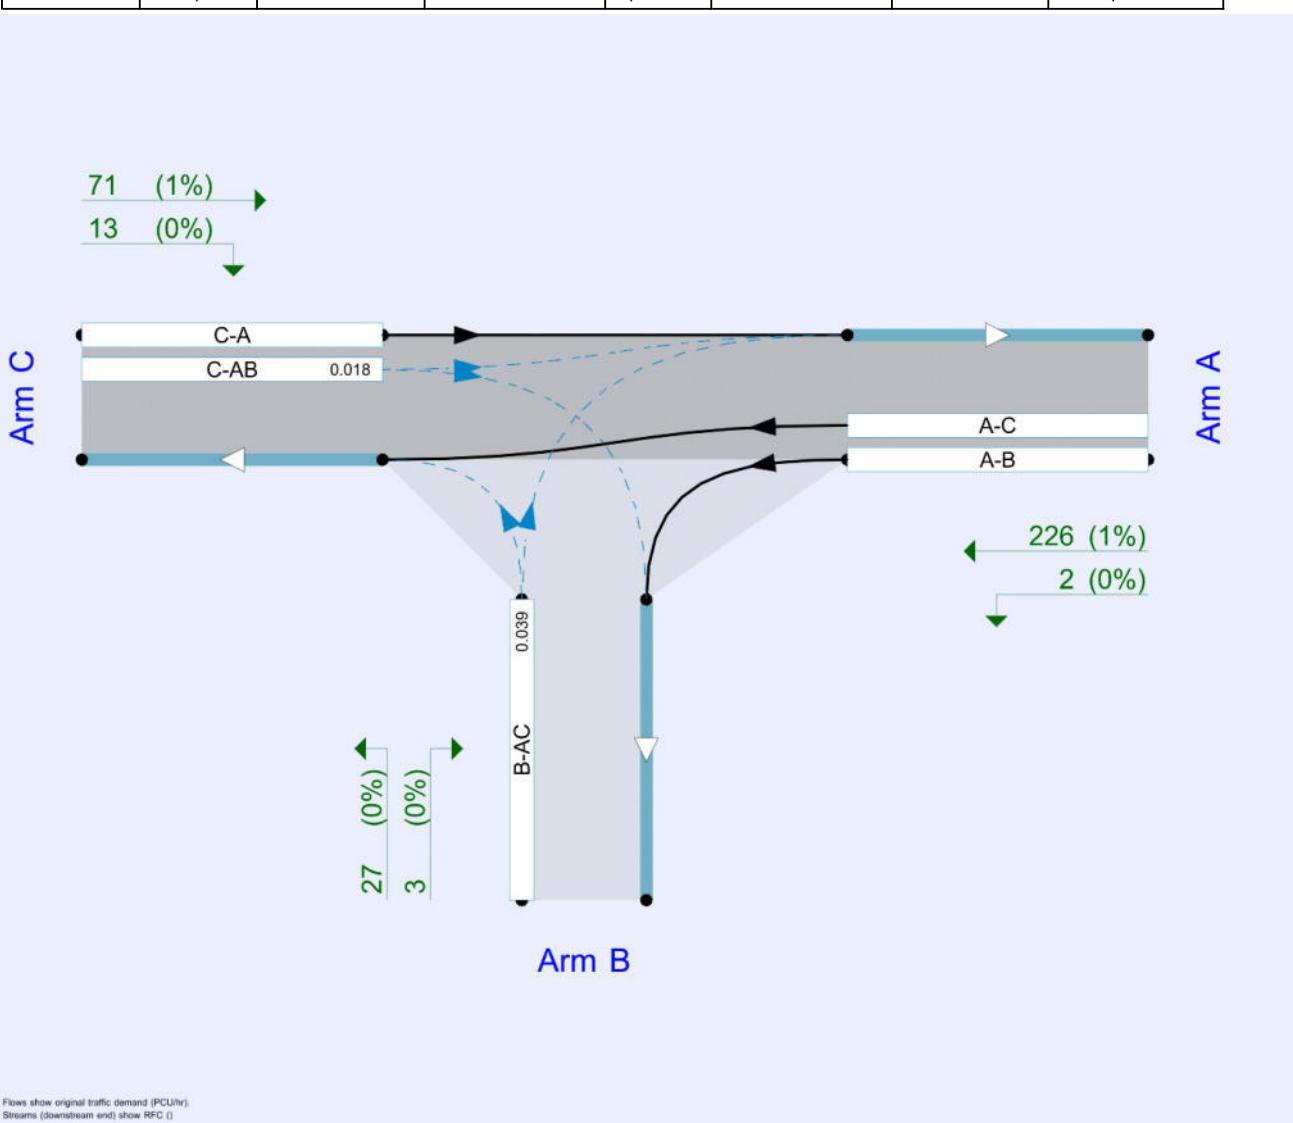

## File summary

### File Description

| D5 | 2038 Year of Opening + 15 Years | AM               | ONE HOUR             | 08:00              | 09:30               | 15                        |
| D6 | 2038 Year of Opening + 15 Years | PM               | ONE HOUR             | 00:00              | 01:30               | 15                        |

### Analysis Set Details

| ID | Name                                  | Network flow scaling factor (%) |
|----|---------------------------------------|---------------------------------|
| A1 | Cairns Road / Residential Development | 100.000                         |

# Cairns Road / Residential Development - 2023 Year of Opening, AM

## Data Errors and Warnings

| Severity | Area             | Item             | Description   |
|----------|------------------|------------------|---|
| Warning  | Queue variations | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Major road direction | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|----------------------|-----------------------|--------------------|--------------|
| 1        | untitled | T-Junction    | Two-way              |                       | 0.87               | A            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | 418                           | Stream B-AC                  |

## Arms

### Arms

| Arm | Name               | Description | Arm type |
|-----|--------------------|-------------|----------|
| A   | Cairns Road South  |             | Major    |
| B   | Development Access |             | Minor    |
| C   | Cairns Road North  |             | Major    |

### Major Arm Geometry

| Arm | Width of carriageway (m) | Has kerbed central reserve | Has right turn bay | Visibility for right turn (m) | Blocks? | Blocking queue (PCU) |
|-----|--------------------------|----------------------------|--------------------|-------------------------------|---------|----------------------|
| C   | 6.00                     |                            |                    | 50.0                          | ✓       | 0.00                 |

Geometries for Arm C are measured opposite Arm B. Geometries for Arm A (if relevant) are measured opposite Arm D.

### Minor Arm Geometry

| Arm | Minor arm type | Lane width (m) | Visibility to left (m) | Visibility to right (m) |
|-----|----------------|----------------|------------------------|-------------------------|
| B   | One lane       | 3.00           | 20                     | 20                      |

### Slope / Intercept / Capacity

#### Priority Intersection Slopes and Intercepts

| Stream | Intercept (PCU/hr) | Slope for A-B | Slope for A-C | Slope for C-A | Slope for C-B |
|--------|--------------------|---------------|---------------|---------------|---------------|
| B-A    | 494                | 0.090         | 0.227         | 0.143         | 0.325         |
| B-C    | 637                | 0.098         | 0.247         | -             | -             |
| C-B    | 603                | 0.234         | 0.234         | -             | -             |

The slopes and intercepts shown above do NOT include any corrections or adjustments.

Streams may be combined, in which case capacity will be adjusted.

Values are shown for the first time segment only; they may differ for subsequent time segments.

## Traffic Demand

### Demand Set Details

| ID | Scenario name        | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|----------------------|------------------|----------------------|--------------------|---------------------|---------------------------|
| D1 | 2023 Year of Opening | AM               | ONE HOUR             | 08:00              | 09:30               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 228                     | 100.000            |
| B   |            | ✓            | 30                      | 100.000            |
| C   |            | ✓            | 84                      | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From | To |    |     |   |
|------|----|----|-----|---|
|      |    | A  | B   | C |
| A    | 0  | 2  | 226 |   |
| B    | 3  | 0  | 27  |   |
| C    | 71 | 13 | 0   |   |

## Vehicle Mix

### Heavy Vehicle Percentages

| From | To |   |   |   |
|------|----|---|---|---|
|      |    | A | B | C |
| A    | 0  | 0 | 1 |   |
| B    | 0  | 0 | 0 |   |
| C    | 1  | 0 | 0 |   |

## Results

### Results Summary for whole modelled period

| Stream | Max RFC | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|--------|---------|---------------|-----------------|---------------------------------|---------|
| B-AC   | 0.06    | 6.90          | 0.1             | 0.5                             | A       |
| C-AB   | 0.03    | 6.19          | 0.0             | 0.5                             | A       |
| C-A    |         |               |                 |                                 |         |
| A-B    |         |               |                 |                                 |         |
| A-C    |         |               |                 |                                 |         |

## Main Results for each time segment

**08:00 - 08:15**

| Stream | Total Demand (PCU/hr) | Capacity (PCU/hr) | RFC   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Unsignalised level of service |
|--------|-----------------------|-------------------|-------|---------------------|-----------------|-----------|-------------------------------|
| B-AC   | 23                    | 575               | 0.039 | 22                  | 0.0             | 6.513     | A                             |
| C-AB   | 11                    | 600               | 0.018 | 11                  | 0.0             | 6.118     | A                             |
| C-A    | 52                    |                   |       | 52                  |                 |           |                               |
| A-B    | 2                     |                   |       | 2                   |                 |           |                               |
| A-C    | 170                   |                   |       | 170                 |                 |           |                               |

**08:15 - 08:30**

| Stream | Total Demand (PCU/hr) | Capacity (PCU/hr) | RFC   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Unsignalised level of service |
|--------|-----------------------|-------------------|-------|---------------------|-----------------|-----------|-------------------------------|

# Cairns Road / Residential Development - 2023 Year of Opening, PM

## Data Errors and Warnings

| Severity | Area             | Item             | Description   |
|----------|------------------|------------------|---|
| Warning  | Queue variations | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Major road direction | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|----------------------|-----------------------|--------------------|--------------|
| 1        | untitled | T-Junction    | Two-way              |                       | 0.91               | A            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | 435                           | Stream C-AB                  |

## Traffic Demand

### Demand Set Details

| ID | Scenario name        | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|----------------------|------------------|----------------------|--------------------|---------------------|---------------------------|
| D2 | 2023 Year of Opening | PM               | ONE HOUR             | 00:00              | 01:30               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 100                     | 100.000            |
| B   |            | ✓            | 15                      | 100.000            |
| C   |            | ✓            | 211                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From |   | To  |    |    |
|------|---|-----|----|----|
|      |   |     |    |    |
|      |   | A   | B  | C  |
|      | A | 0   | 3  | 97 |
|      | B | 2   | 0  | 13 |
|      | C | 184 | 27 | 0  |

## Vehicle Mix

### Heavy Vehicle Percentages

| From |   | To |   |   |
|------|---|----|---|---|
|      |   |    |   |   |
|      |   | A  | B | C |
|      | A | 0  | 0 | 1 |
|      | B | 0  | 0 | 0 |
|      | C | 1  | 0 | 0 |

## Results

### Results Summary for whole modelled period

| Stream | Max RFC | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|--------|---------|---------------|-----------------|---------------------------------|---------|
| B-AC   | 0.03    | 6.41          | 0.0             | 0.5                             | A       |
| C-AB   | 0.06    | 5.53          | 0.1             | 0.5                             | A       |
| C-A    |         |               |                 |                                 |         |
| A-B    |         |               |                 |                                 |         |
| A-C    |         |               |                 |                                 |         |

### Main Results for each time segment

#### 00:00 - 00:15

| Stream | Total Demand (PCU/hr) | Capacity (PCU/hr) | RFC   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Unsignalised level of service |
|--------|-----------------------|-------------------|-------|---------------------|-----------------|-----------|-------------------------------|
| B-AC   | 11                    | 589               | 0.019 | 11                  | 0.0             | 6.229     | A                             |

# Cairns Road / Residential Development - 2028 Year of Opening + 5 Years, AM

## Data Errors and Warnings

| Severity | Area             | Item             | Description   |
|----------|------------------|------------------|---|
| Warning  | Queue variations | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Major road direction | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|----------------------|-----------------------|--------------------|--------------|
| 1        | untitled | T-Junction    | Two-way              |                       | 0.83               | A            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | 393                           | Stream B-AC                  |

## Traffic Demand

### Demand Set Details

| ID | Scenario name                  | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|--------------------------------|------------------|----------------------|--------------------|---------------------|---------------------------|
| D3 | 2028 Year of Opening + 5 Years | AM               | ONE HOUR             | 08:00              | 09:30               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 245                     | 100.000            |
| B   |            | ✓            | 30                      | 100.000            |
| C   |            | ✓            | 89                      | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From | To |    |    |     |
|------|----|----|----|-----|
|      |    | A  | B  | C   |
|      | A  | 0  | 2  | 243 |
| B    | 3  | 0  | 27 |     |
| C    | 76 | 13 | 0  |     |

## Vehicle Mix

### Heavy Vehicle Percentages

| From | To |   |   |   |
|------|----|---|---|---|
|      |    | A | B | C |
|      | A  | 0 | 0 | 1 |
| B    | 0  | 0 | 0 |   |
| C    | 1  | 0 | 0 |   |

## Results

### Results Summary for whole modelled period

| Stream | Max RFC | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|--------|---------|---------------|-----------------|---------------------------------|---------|
| B-AC   | 0.06    | 6.96          | 0.1             | 0.5                             | A       |
| C-AB   | 0.03    | 6.20          | 0.0             | 0.5                             | A       |
| C-A    |         |               |                 |                                 |         |
| A-B    |         |               |                 |                                 |         |

# Cairns Road / Residential Development - 2028 Year of Opening + 5 Years, PM

## Data Errors and Warnings

| Severity | Area             | Item             | Description   |
|----------|------------------|------------------|---|
| Warning  | Queue variations | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Major road direction | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|----------------------|-----------------------|--------------------|--------------|
| 1        | untitled | T-Junction    | Two-way              |                       | 0.86               | A            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | 412                           | Stream C-AB                  |

## Traffic Demand

### Demand Set Details

| ID | Scenario name                  | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|--------------------------------|------------------|----------------------|--------------------|---------------------|---------------------------|
| D4 | 2028 Year of Opening + 5 Years | PM               | ONE HOUR             | 00:00              | 01:30               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 107                     | 100.000            |
| B   |            | ✓            | 15                      | 100.000            |
| C   |            | ✓            | 224                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From | To  |    |    |     |
|------|-----|----|----|-----|
|      |     | A  | B  | C   |
|      | A   | 0  | 3  | 104 |
| B    | 2   | 0  | 13 |     |
| C    | 197 | 27 | 0  |     |

## Vehicle Mix

### Heavy Vehicle Percentages

| From | To |   |   |   |
|------|----|---|---|---|
|      |    | A | B | C |
|      | A  | 0 | 0 | 1 |
| B    | 0  | 0 | 0 |   |
| C    | 1  | 0 | 0 |   |

## Results

### Results Summary for whole modelled period

| Stream | Max RFC | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|--------|---------|---------------|-----------------|---------------------------------|---------|
| B-AC   | 0.03    | 6.44          | 0.0             | 0.5                             | A       |
| C-AB   | 0.06    | 5.48          | 0.1             | 0.5                             | A       |
| C-A    |         |               |                 |                                 |         |

# Cairns Road / Residential Development - 2038 Year of Opening + 15 Years, AM

## Data Errors and Warnings

| Severity | Area             | Item             | Description   |
|----------|------------------|------------------|---|
| Warning  | Queue variations | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Major road direction | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|----------------------|-----------------------|--------------------|--------------|
| 1        | untitled | T-Junction    | Two-way              |                       | 0.79               | A            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | 376                           | Stream B-AC                  |

## Traffic Demand

### Demand Set Details

| ID | Scenario name                   | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|---------------------------------|------------------|----------------------|--------------------|---------------------|---------------------------|
| D5 | 2038 Year of Opening + 15 Years | AM               | ONE HOUR             | 08:00              | 09:30               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 257                     | 100.000            |
| B   |            | ✓            | 30                      | 100.000            |
| C   |            | ✓            | 94                      | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From |   | To |    |     |
|------|---|----|----|-----|
|      |   | A  | B  | C   |
|      | A | 0  | 2  | 255 |
|      | B | 3  | 0  | 27  |
|      | C | 81 | 13 | 0   |

## Vehicle Mix

### Heavy Vehicle Percentages

| From |   | To |   |   |

# Cairns Road / Residential Development - 2038 Year of Opening + 15 Years, PM

## Data Errors and Warnings

| Severity | Area             | Item             | Description   |
|----------|------------------|------------------|---|
| Warning  | Queue variations | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Major road direction | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|----------------------|-----------------------|--------------------|--------------|
| 1        | untitled | T-Junction    | Two-way              |                       | 0.83               | A            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | 393                           | Stream C-AB                  |

## Traffic Demand

### Demand Set Details

| ID | Scenario name                   | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|---------------------------------|------------------|----------------------|--------------------|---------------------|---------------------------|
| D6 | 2038 Year of Opening + 15 Years | PM               | ONE HOUR             | 00:00              | 01:30               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 113                     | 100.000            |
| B   |            | ✓            | 15                      | 100.000            |
| C   |            | ✓            | 235                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From |   | To  |    |     |
|------|---|-----|----|-----|
|      |   |     |    |     |
|      |   | A   | B  | C   |
|      | A | 0   | 3  | 110 |
|      | B | 2   | 0  | 13  |
|      | C | 208 | 27 | 0   |

## Vehicle Mix

### Heavy Vehicle Percentages

| From |   | To |   |   |
|------|---|----|---|---|
|      |   |    |   |   |
|      |   | A  | B | C |
|      | A | 0  | 0 | 1 |
|      | B | 0  | 0 | 0 |
|      | C | 1  | 0 | 0 |

## Results

### Results Summary for whole modelled period

| Stream | Max RFC | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|--------|---------|---------------|-----------------|---------------------------------|---------|
| B-AC   | 0.03    | 6.46          | 0.0             | 0.5                             | A       |
| C-AB   | 0.06    | 5.45          | 0.1             | 0.5                             | A       |
| C-A    |         |               |                 |                                 |         |
| A-B    |         |               |                 |                                 |         |
| A-C    |         |               |                 |                                 |         |

### Main Results for each time segment

#### 00:00 - 00:15

| Stream | Total Demand (PCU/hr) | Capacity (PCU/hr) | RFC   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Unsignalised level of service |
|--------|-----------------------|-------------------|-------|---------------------|-----------------|-----------|-------------------------------|
| B-AC   | 11                    | 586               | 0.019 | 11                  | 0.0             | 6.262     | A                             |
| C-AB   | 26                    | 689               | 0.038 | 26                  | 0.1             | 5.442     | A                             |

There are warnings associated with one or more model runs - see the 'Data Errors and Warnings' tables for each Analysis or Demand Set.

Values shown are the highest values encountered over all time segments. Delay is the maximum value of average delay per arriving vehicle. Junction LOS and Junction Delay are demand-weighted averages. Network Residual Capacity indicates the amount by which network flow could be increased before a user-definable threshold (see Analysis Options) is met.

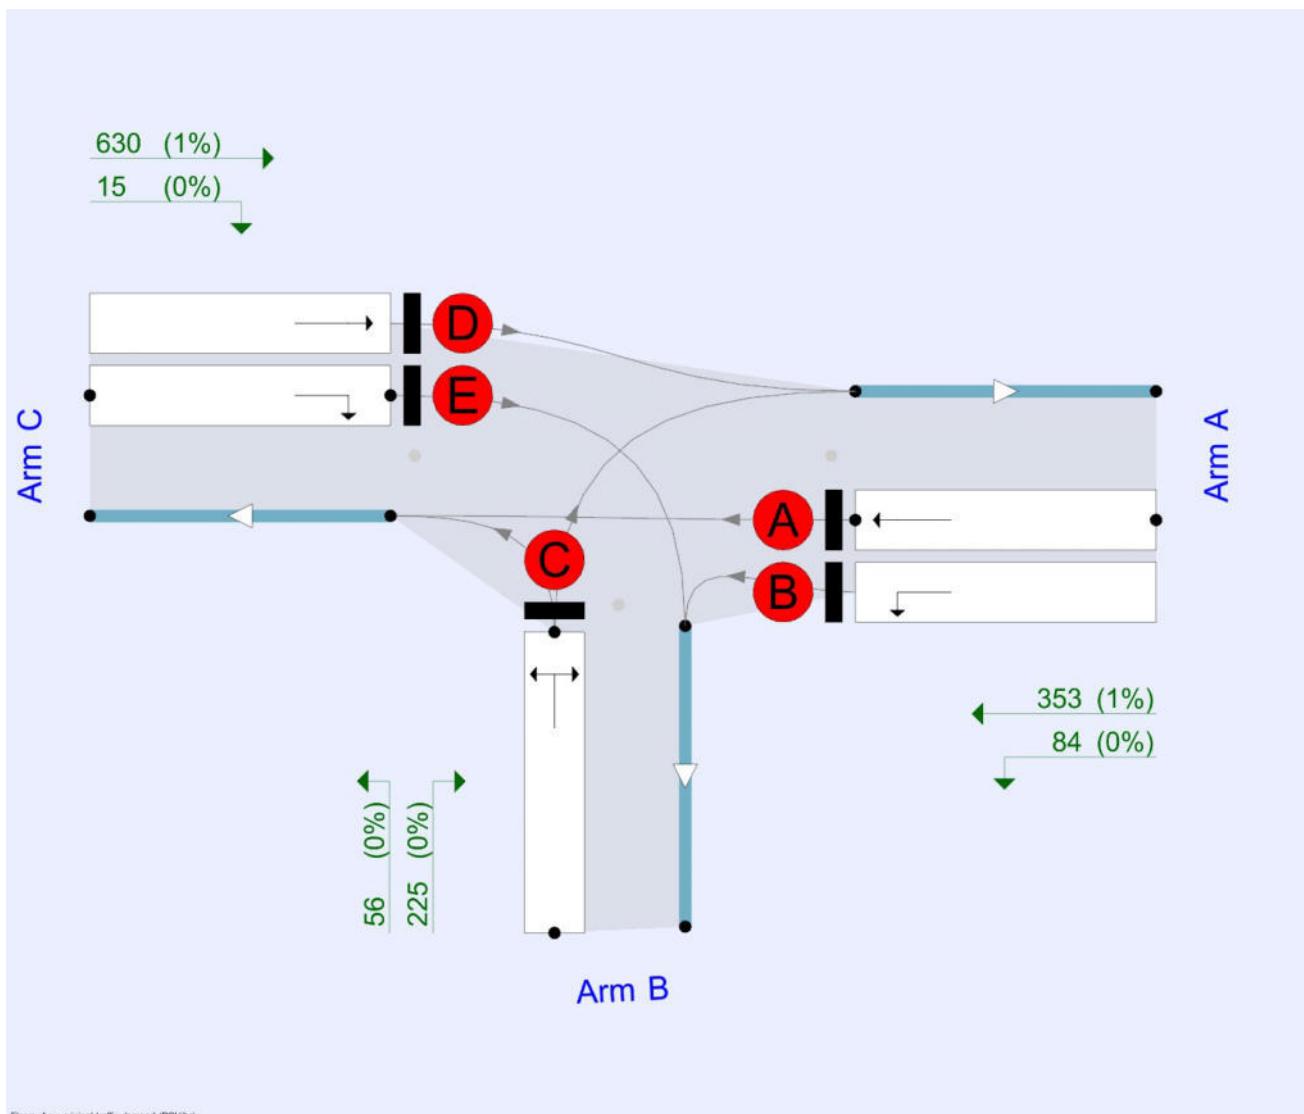

## File summary

### File Description

|             |  |
|-------------|--|
| Title       | Residential Development at Cairns Road |
| Location    |  |
| Site number |  |
| Date        | 21/02/2022                             |
| Version     |  |
| Status      | (new file)                             |
| Identifier  |  |
| Client      |  |
| Jobnumber   |  |
| Enumerator  | JODIRELAND\jdoogan                     |
| Description |  |

## Units

| Distance units | Speed units | Traffic units input | Traffic units results | Flow units | Average delay units | Total delay units | Rate of delay units |
|----------------|-------------|---------------------|-----------------------|------------|---------------------|-------------------|---------------------|
| m              | kph         | PCU                 | PCU                   | perHour    | s                   | -Min              | perMin              |

Flows show original traffic demand (PCU/hr).

The junction diagram reflects the last run of Junctions.

### Analysis Options

| Calculate Queue Percentiles | Calculate residual capacity | Residual capacity criteria type | DOS Threshold | Average Delay threshold (s) | Queue threshold (PCU) |
|-----------------------------|-----------------------------|---------------------------------|---------------|-----------------------------|-----------------------|
| ✓                           | ✓                           | Delay                           | 0.85          | 36.00                       | 20.00                 |

### Demand Set Summary

| ID | Scenario name                                 | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|---|------------------|----------------------|--------------------|---------------------|---------------------------|
| D1 | 2022 Existing Traffic Flows                   | AM               | ONE HOUR             | 08:15              | 09:45               | 15                        |

| D8 | 2038 Year of Opening + 15 Without Development | PM               | ONE HOUR             | 17:00              | 18:30               | 15                        |

### Analysis Set Details

| ID | Name                      | Network flow scaling factor (%) |
|----|---------------------------|---------------------------------|
| A1 | Pearse Road / Cairns Road | 100.000                         |

# Pearse Road / Cairns Road - 2022 Existing Traffic Flows, AM

## Data Errors and Warnings

| Severity | Area              | Item             | Description   |
|----------|-------------------|------------------|---|
| Warning  | Queue percentiles | Analysis Options | Queue percentiles cannot be calculated for signalised junction unless in Lane Simulation mode.      |
| Warning  | Queue variations  | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|-----------------------|--------------------|--------------|
| 1        | untitled | Signalised    |                       | 22.32              | C            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | -14                           | Arm B - Traffic Stream 1     |

## Arms

### Arms

| Arm | Name                       | Description |
|-----|----------------------------|-------------|
| A   | Pearse Road - R287 (North) |             |
| B   | Cairns Road                |             |
| C   | Pearse Road - R287 (South) |             |

### OSCADY Traffic Streams

| Arm | Traffic Stream | Phase | Destination arms | Straight move |
|-----|----------------|-------|------------------|---------------|
| A   | 1              | B     | B                | C             |
|     | 2              | A     | C                | C             |
| B   | 1              | C     | A, C             |               |
| C   | 1              | D     | A                | A             |

### OSCADY Lanes

| Arm | Traffic Stream | Destination arms | Gradient (%) | Width (m) | Turning radius (m) | Nearside lane | Has bay |
|-----|----------------|------------------|--------------|-----------|--------------------|---------------|---------|
| A   | 1              | B                | 0            | 3.00      | 10.00              | ✓             |         |
|     | 2              | C                | 0            | 3.00      |                    | ✓             |         |
| B   | 1              | A, C             | 0            | 3.00      | 10.00              | ✓             |         |
| C   | 1              | A                | 0            | 3.00      |                    | ✓             |         |
|     | 2              | B                | 0            | 3.00      | 10.00              | ✓             |         |

## Signal Timings

### Junction 1

| Junction | Sequence to use | Cycle time (s) | Maximum cycle time (s) | Start displacement (s) | End displacement (s) |
|----------|-----------------|----------------|------------------------|------------------------|----------------------|
| 1        | 1               | 70             | 300                    | 1.40                   | 2.90                 |

## Optimisation options

| Junction | Optimise stage lengths | Optimise cycle time | Optimiser demand source | Optimiser message                   |
|----------|------------------------|---------------------|-------------------------|-------------------------------------|
| 1        | ✓                      | ✓                   | Average                 | Timings provide delay minimisation. |

## Phases

| Junction | Phase | Name | Minimum green (s) |
|----------|-------|------|-------------------|
| 1        | A     |      | 7                 |
|          | B     |      | 7                 |
|          | C     |      | 7                 |
|          | D     |      | 7                 |
|          | E     |      | 7                 |
|          | PED   |      | 7                 |

## Library Stages

| Junction | Library Stage | Phases in stage | User stage minimum (s) | Run every N cycles | Probability of running (%) |
|----------|---------------|-----------------|------------------------|--------------------|----------------------------|
| 1        | 1             | D, E            | 1                      |                    |                            |
|          | 2             | A, D, B, E      | 1                      |                    |                            |
|          | 3             | B, C            | 1                      |                    |                            |
|          | 4             | PED             | 1                      |                    |                            |

## Stage Sequences

| Junction | Sequence | Name | Stage IDs  | Stage ends      |
|----------|----------|------|------------|-----------------|
| 1        | 1        |      | 2, 3, 4    | 38, 58, 0       |
|          | 2        |      | 2, 4, 3    | 34, 73, 111     |
|          | 3        |      | 1, 2, 3, 4 | 21, 48, 80, 111 |
|          | 4        |      | 1, 2, 4, 3 | 21, 48, 80, 111 |
|          | 5        |      | 1, 3, 2, 4 | 24, 53, 82, 111 |
|          | 6        |      | 1, 3, 4, 2 | 21, 53, 85, 0   |
|          | 7        |      | 1, 4, 2, 3 | 24, 53, 82, 111 |
|          | 8        |      | 1, 4, 3, 2 | 21, 53, 85, 0   |

## Intergreen Matrix for Junction 1

|      |     | To |   |   |   |   |     |

# Pearse Road / Cairns Road - 2022 Existing Traffic Flows, PM

## Data Errors and Warnings

| Severity | Area              | Item             | Description   |
|----------|-------------------|------------------|---|
| Warning  | Queue percentiles | Analysis Options | Queue percentiles cannot be calculated for signalised junction unless in Lane Simulation mode.      |
| Warning  | Queue variations  | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|-----------------------|--------------------|--------------|
| 1        | untitled | Signalised    |                       | 13.64              | B            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | -100                          | Arm B - Traffic Stream 1     |

## Traffic Demand

### Demand Set Details

| ID | Scenario name               | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|-----------------------------|------------------|----------------------|--------------------|---------------------|---------------------------|
| D2 | 2022 Existing Traffic Flows | PM               | ONE HOUR             | 17:00              | 18:30               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 885                     | 100.000            |
| B   |            | ✓            | 130                     | 100.000            |
| C   |            | ✓            | 556                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From |   | To  |     |     |
|------|---|-----|-----|-----|
|      |   | A   | B   | C   |
|      | A | 0   | 157 | 728 |
|      | B | 96  | 0   | 34  |
|      | C | 493 | 63  | 0   |

## Vehicle Mix

### Heavy Vehicle Percentages

| From |   | To |   |   |
|------|---|----|---|---|
|      |   | A  | B | C |
|      | A | 0  | 0 | 1 |
|      | B | 0  | 0 | 0 |
|      | C | 1  | 0 | 0 |

## Results

### Results Summary for whole modelled period

| Arm | Max DOS | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|-----|---------|---------------|-----------------|---------------------------------|---------|
| A   | 0.61    | 9.10          | 8.1             | ?                               | A       |
| B   | 0.73    | 70.91         | 4.6             | ?                               | E       |
| C   | 0.41    | 7.47          | 5.4             | ?                               | A       |

### Main Results for each time segment

17:00 - 17:15

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |
|-----|----------------|-----------------------|-------------------------------------|--------------------------|----------|-------------------|-------|---------------------|-----------------|-----------|-----------------------------|
| A   | 1              | 118                   | 1665                                | 82.50                    | 0.00     | 1402              | 0.084 | 116                 | 0.5             | 1.461     | A                           |
|     | 2              | 548                   | 1915                                | 67.50                    | 0.00     | 1319              | 0.416 | 529                 | 4.8             | 7.817     | A                           |
| B   | 1              | 98                    | 1665                                | 11.50                    | 0.00     | 195               | 0.501 | 87                  | 2.6             | 50.907    | D                           |
| C   | 1              | 371                   | 1915                                | 67.50                    | 0.00     | 1319              | 0.281 | 358                 | 3.2             | 6.533     | A                           |
|     | 2              | 47                    | 1665                                | 67.50                    | 0.00     | 1147              | 0.041 | 46                  | 0.4             | 4.967     | A                           |

17:15 - 17:30

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |

# Pearse Road / Cairns Road - 2023 Year of Opening Without Development, AM

## Data Errors and Warnings

| Severity | Area              | Item             | Description   |
|----------|-------------------|------------------|---|
| Warning  | Queue percentiles | Analysis Options | Queue percentiles cannot be calculated for signalised junction unless in Lane Simulation mode.      |
| Warning  | Queue variations  | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|-----------------------|--------------------|--------------|
| 1        | untitled | Signalised    |                       | 22.80              | C            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | -18                           | Arm B - Traffic Stream 1     |

## Traffic Demand

### Demand Set Details

| ID | Scenario name                            | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|--|------------------|----------------------|--------------------|---------------------|---------------------------|
| D3 | 2023 Year of Opening Without Development | AM               | ONE HOUR             | 08:15              | 09:45               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 441                     | 100.000            |
| B   |            | ✓            | 284                     | 100.000            |
| C   |            | ✓            | 652                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From |   | To  |    |     |
|------|---|-----|----|-----|
|      |   | A   | B  | C   |
|      | A | 0   | 85 | 356 |
|      | B | 227 | 0  | 57  |
|      | C | 636 | 16 | 0   |

## Vehicle Mix

### Heavy Vehicle Percentages

| From |   | To |   |   |
|------|---|----|---|---|
|      |   | A  | B | C |
|      | A | 0  | 0 | 1 |
|      | B | 0  | 0 | 0 |
|      | C | 1  | 0 | 0 |

## Results

### Results Summary for whole modelled period

| Arm | Max DOS | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|-----|---------|---------------|-----------------|---------------------------------|---------|
| A   | 0.41    | 10.65         | 4.4             | ?                               | B       |
| B   | 0.81    | 48.32         | 6.6             | ?                               | D       |
| C   | 0.73    | 19.90         | 8.3             | ?                               | B       |

### Main Results for each time segment

08:15 - 08:30

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |
|-----|----------------|-----------------------|-------------------------------------|--------------------------|----------|-------------------|-------|---------------------|-----------------|-----------|-----------------------------|
| A   | 1              | 64                    | 1665                                | 55.50                    | 0.00     | 1302              | 0.049 | 63                  | 0.3             | 1.845     | A                           |
|     | 2              | 268                   | 1915                                | 35.50                    | 0.00     | 958               | 0.280 | 257                 | 2.7             | 11.201    | B                           |
| B   | 1              | 214                   | 1665                                | 16.50                    | 0.00     | 387               | 0.552 | 199                 | 3.6             | 30.571    | C                           |
| C   | 1              | 479                   | 1915                                | 35.50                    | 0.00     | 958               | 0.500 | 459                 | 5.0             | 14.079    | B                           |
|     | 2              | 12                    | 1665                                | 35.50                    | 0.00     | 833               | 0.014 | 12                  | 0.1             | 8.978     | A                           |

08:30 - 08:45

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |

## Data Errors and Warnings

| Severity | Area              | Item             | Description   |
|----------|-------------------|------------------|---|
| Warning  | Queue percentiles | Analysis Options | Queue percentiles cannot be calculated for signalised junction unless in Lane Simulation mode.      |
| Warning  | Queue variations  | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|-----------------------|--------------------|--------------|
| 1        | untitled | Signalised    |                       | 13.55              | B            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | -100                          | Arm B - Traffic Stream 1     |

## Traffic Demand

### Demand Set Details

| ID | Scenario name                            | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|--|------------------|----------------------|--------------------|---------------------|---------------------------|
| D4 | 2023 Year of Opening Without Development | PM               | ONE HOUR             | 17:00              | 18:30               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 893                     | 100.000            |
| B   |            | ✓            | 132                     | 100.000            |
| C   |            | ✓            | 562                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From |   | To  |     |     |
|------|---|-----|-----|-----|
|      |   | A   | B   | C   |
|      | A | 0   | 158 | 735 |
|      | B | 97  | 0   | 35  |
|      | C | 498 | 64  | 0   |

## Vehicle Mix

### Heavy Vehicle Percentages

| From |   | To |   |   |
|------|---|----|---|---|
|      |   | A  | B | C |
|      | A | 0  | 0 | 1 |
|      | B | 0  | 0 | 0 |
|      | C | 1  | 0 | 0 |

## Results

### Results Summary for whole modelled period

| Arm | Max DOS | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|-----|---------|---------------|-----------------|---------------------------------|---------|
| A   | 0.62    | 9.66          | 8.4             | ?                               | A       |
| B   | 0.69    | 63.93         | 4.4             | ?                               | E       |
| C   | 0.42    | 7.90          | 5.6             | ?                               | A       |

### Main Results for each time segment

17:00 - 17:15

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |
|-----|----------------|-----------------------|-------------------------------------|--------------------------|----------|-------------------|-------|---------------------|-----------------|-----------|-----------------------------|
| A   | 1              | 119                   | 1665                                | 83.50                    | 0.00     | 1405              | 0.085 | 117                 | 0.5             | 1.449     | A                           |
|     | 2              | 553                   | 1915                                | 67.50                    | 0.00     | 1306              | 0.424 | 533                 | 5.0             | 8.268     | A                           |
| B   | 1              | 99                    | 1665                                | 12.50                    | 0.00     | 210               | 0.473 | 89                  | 2.6             | 48.891    | D                           |
| C   | 1              | 375                   | 1915                                | 67.50                    | 0.00     | 1306              | 0.287 | 362                 | 3.4             | 6.902     | A                           |
|     | 2              | 48                    | 1665                                | 67.50                    | 0.00     | 1135              | 0.042 | 46                  | 0.4             | 5.245     | A                           |

17:15 - 17:30

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |
|-----|----------------|-----------------------|-------------------------------------|--------------------------|----------|-------------------|-------|---------------------|-----------------|-----------|-----------------------------|
| A   | 1              | 142                   | 1665                                | 83.50                    | 0.00     | 1405              | 0.101 | 142                 | 0.6             | 1.499     | A                           |

# Pearse Road / Cairns Road - 2028 Year of Opening + 5 Without Development, AM

## Data Errors and Warnings

| Severity | Area              | Item             | Description   |
|----------|-------------------|------------------|---|
| Warning  | Queue percentiles | Analysis Options | Queue percentiles cannot be calculated for signalised junction unless in Lane Simulation mode.      |
| Warning  | Queue variations  | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|-----------------------|--------------------|--------------|
| 1        | untitled | Signalised    |                       | 24.67              | C            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | -20                           | Arm B - Traffic Stream 1     |

## Traffic Demand

### Demand Set Details

| ID | Scenario name                                | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|--|------------------|----------------------|--------------------|---------------------|---------------------------|
| D5 | 2028 Year of Opening + 5 Without Development | AM               | ONE HOUR             | 08:15              | 09:45               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 468                     | 100.000            |
| B   |            | ✓            | 300                     | 100.000            |
| C   |            | ✓            | 690                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From |   | To  |    |     |
|------|---|-----|----|-----|
|      |   | A   | B  | C   |
|      | A | 0   | 90 | 378 |
|      | B | 240 | 0  | 60  |
|      | C | 674 | 16 | 0   |

## Vehicle Mix

### Heavy Vehicle Percentages

| From | To |   |   |   |
|------|----|---|---|---|
|      |    | A | B | C |
| A    | 0  | 0 | 1 |   |
| B    | 0  | 0 | 0 |   |
| C    | 1  | 0 | 0 |   |

## Results

### Results Summary for whole modelled period

| Arm | Max DOS | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|-----|---------|---------------|-----------------|---------------------------------|---------|
| A   | 0.43    | 11.19         | 4.9             | ?                               | B       |
| B   | 0.83    | 50.93         | 7.3             | ?                               | D       |
| C   | 0.78    | 22.39         | 9.3             | ?                               | C       |

### Main Results for each time segment

#### 08:15 - 08:30

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |
|-----|----------------|-----------------------|-------------------------------------|--------------------------|----------|-------------------|-------|---------------------|-----------------|-----------|-----------------------------|

# Pearse Road / Cairns Road - 2028 Year of Opening + 5 Without Development, PM

## Data Errors and Warnings

| Severity | Area              | Item             | Description   |
|----------|-------------------|------------------|---|
| Warning  | Queue percentiles | Analysis Options | Queue percentiles cannot be calculated for signalised junction unless in Lane Simulation mode.      |
| Warning  | Queue variations  | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|-----------------------|--------------------|--------------|
| 1        | untitled | Signalised    |                       | 14.29              | B            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | -100                          | Arm B - Traffic Stream 1     |

## Traffic Demand

### Demand Set Details

| ID | Scenario name                                | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|--|------------------|----------------------|--------------------|---------------------|---------------------------|
| D6 | 2028 Year of Opening + 5 Without Development | PM               | ONE HOUR             | 17:00              | 18:30               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 947                     | 100.000            |
| B   |            | ✓            | 138                     | 100.000            |
| C   |            | ✓            | 596                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From |   | To  |     |     |
|------|---|-----|-----|-----|
|      |   | A   | B   | C   |
|      | A | 0   | 168 | 779 |
|      | B | 102 | 0   | 36  |
|      | C | 528 | 68  | 0   |

## Vehicle Mix

### Heavy Vehicle Percentages

|      | To |   |   |   |
|------|----|---|---|---|
|      |    | A | B | C |
| From | A  | 0 | 0 | 1 |
|      | B  | 0 | 0 | 0 |
|      | C  | 1 | 0 | 0 |

## Results

### Results Summary for whole modelled period

| Arm | Max DOS | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|-----|---------|---------------|-----------------|---------------------------------|---------|
| A   | 0.65    | 10.15         | 9.3             | ?                               | B       |
| B   | 0.72    | 69.44         | 4.9             | ?                               | E       |
| C   | 0.44    | 8.08          | 6.1             | ?                               | A       |

### Main Results for each time segment

#### 17:00 - 17:15

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |
|-----|----------------|-----------------------|-------------------------------------|--------------------------|----------|-------------------|-------|---------------------|-----------------|-----------|-----------------------------|
| A   | 1              | 126                   | 1665                                | 90.50                    | 0.00     | 1422              | 0.089 | 124                 | 0.5             | 1.375     | A                           |
|     | 2              | 586                   | 1915                                | 73.50                    | 0.00     | 1328              | 0.442 | 564                 | 5.5             | 8.471     | A                           |
| B   | 1              | 104                   | 1665                                | 13.50                    | 0.00     | 212               | 0.490 | 92                  | 2.9             | 52.249    | D                           |

# Pearse Road / Cairns Road - 2038 Year of Opening + 15 Without Development, AM

## Data Errors and Warnings

| Severity | Area              | Item             | Description   |
|----------|-------------------|------------------|---|
| Warning  | Queue percentiles | Analysis Options | Queue percentiles cannot be calculated for signalised junction unless in Lane Simulation mode.      |
| Warning  | Queue variations  | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|-----------------------|--------------------|--------------|
| 1        | untitled | Signalised    |                       | 26.72              | C            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | -23                           | Arm B - Traffic Stream 1     |

## Traffic Demand

### Demand Set Details

| ID | Scenario name                                 | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|---|------------------|----------------------|--------------------|---------------------|---------------------------|
| D7 | 2038 Year of Opening + 15 Without Development | AM               | ONE HOUR             | 08:15              | 09:45               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 494                     | 100.000            |
| B   |            | ✓            | 318                     | 100.000            |
| C   |            | ✓            | 729                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From |   | To  |    |     |
|------|---|-----|----|-----|
|      |   | A   | B  | C   |
|      | A | 0   | 95 | 399 |
|      | B | 254 | 0  | 64  |
|      | C | 712 | 17 | 0   |

## Vehicle Mix

### Heavy Vehicle Percentages

| From | To |   |   |   |
|------|----|---|---|---|
|      |    | A | B | C |
| A    | 0  | 0 | 1 |   |
| B    | 0  | 0 | 0 |   |
| C    | 1  | 0 | 0 |   |

## Results

### Results Summary for whole modelled period

| Arm | Max DOS | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|-----|---------|---------------|-----------------|---------------------------------|---------|
| A   | 0.45    | 11.81         | 5.4             | ?                               | B       |
| B   | 0.84    | 53.56         | 8.1             | ?                               | D       |
| C   | 0.81    | 25.11         | 10.6            | ?                               | C       |

### Main Results for each time segment

#### 08:15 - 08:30

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |
|-----|----------------|-----------------------|-------------------------------------|--------------------------|----------|-------------------|-------|---------------------|-----------------|-----------|-----------------------------|
| A   | 1              | 72                    | 1665                                | 62.50                    | 0.00     | 1334              | 0.054 | 70                  | 0.3             | 1.701     | A                           |

# Pearse Road / Cairns Road - 2038 Year of Opening + 15 Without Development, PM

## Data Errors and Warnings

| Severity | Area              | Item             | Description   |
|----------|-------------------|------------------|---|
| Warning  | Queue percentiles | Analysis Options | Queue percentiles cannot be calculated for signalised junction unless in Lane Simulation mode.      |
| Warning  | Queue variations  | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|-----------------------|--------------------|--------------|
| 1        | untitled | Signalised    |                       | 15.46              | B            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | -100                          | Arm B - Traffic Stream 1     |

## Traffic Demand

### Demand Set Details

| ID | Scenario name                                 | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|---|------------------|----------------------|--------------------|---------------------|---------------------------|
| D8 | 2038 Year of Opening + 15 Without Development | PM               | ONE HOUR             | 17:00              | 18:30               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 1001                    | 100.000            |
| B   |            | ✓            | 148                     | 100.000            |
| C   |            | ✓            | 628                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From |   | To  |     |     |
|------|---|-----|-----|-----|
|      |   | A   | B   | C   |
|      | A | 0   | 178 | 823 |
|      | B | 109 | 0   | 39  |
|      | C | 557 | 71  | 0   |

## Vehicle Mix

### Heavy Vehicle Percentages

|      | To |   |   |   |
|------|----|---|---|---|
|      | A  | B | C |   |
| From | A  | 0 | 0 | 1 |
|      | B  | 0 | 0 | 0 |
|      | C  | 1 | 0 | 0 |

## Results

### Results Summary for whole modelled period

| Arm | Max DOS | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|-----|---------|---------------|-----------------|---------------------------------|---------|
| A   | 0.69    | 11.08         | 9.9             | ?                               | B       |
| B   | 0.76    | 74.86         | 5.5             | ?                               | E       |
| C   | 0.46    | 8.44          | 6.5             | ?                               | A       |

### Main Results for each time segment

#### 17:00 - 17:15

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |
|-----|----------------|-----------------------|-------------------------------------|--------------------------|----------|-------------------|-------|---------------------|-----------------|-----------|-----------------------------|
| A   | 1              | 134                   | 1665                                | 89.50                    | 0.00     | 1419              | 0.094 | 132                 | 0.6             | 1.403     | A                           |
|     | 2              | 620                   | 1915                                | 72.50                    | 0.00     | 1322              | 0.469 | 596                 | 5.8             | 8.877     | A                           |
| B   | 1              | 111                   | 1665                                | 13.50                    | 0.00     | 214               | 0.520 | 99                  | 3.2             | 52.933    | D                           |

There are warnings associated with one or more model runs - see the 'Data Errors and Warnings' tables for each Analysis or Demand Set.

Values shown are the highest values encountered over all time segments. Delay is the maximum value of average delay per arriving vehicle. Junction LOS and Junction Delay are demand-weighted averages. Network Residual Capacity indicates the amount by which network flow could be increased before a user-definable threshold (see Analysis Options) is met.

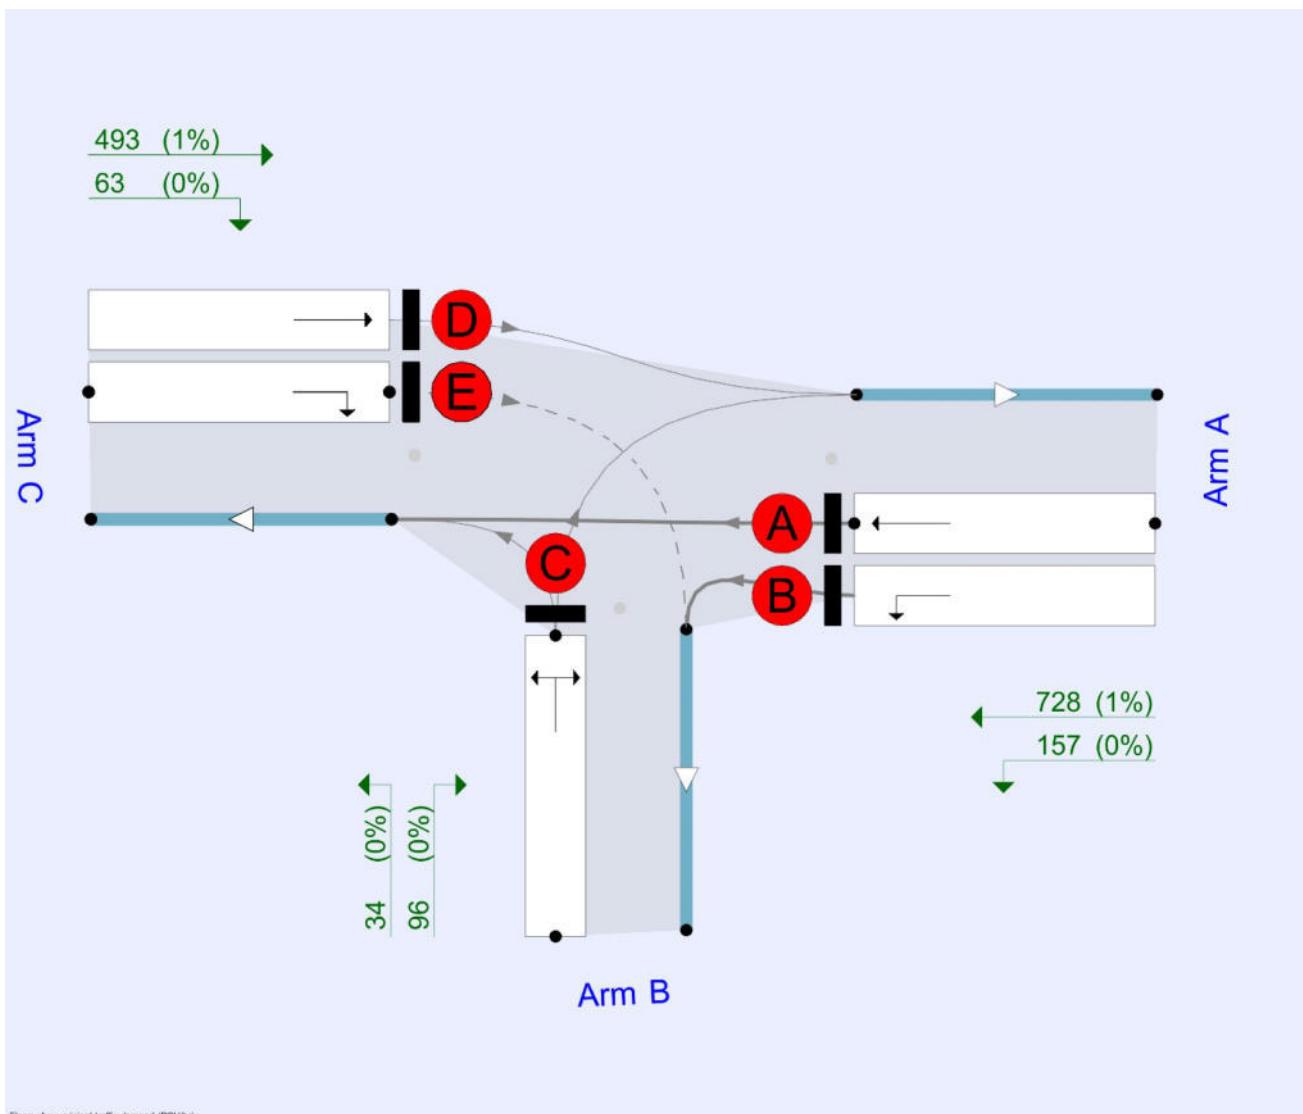

## File summary

### File Description

| Description |  |

## Units

| Distance units | Speed units | Traffic units input | Traffic units results | Flow units | Average delay units | Total delay units | Rate of delay units |
|----------------|-------------|---------------------|-----------------------|------------|---------------------|-------------------|---------------------|
| m              | kph         | PCU                 | PCU                   | perHour    | s                   | -Min              | perMin              |

Flows show original traffic demand (PCU/hr).

The junction diagram reflects the last run of Junctions.

### Analysis Options

| Calculate Queue Percentiles | Calculate residual capacity | Residual capacity criteria type | DOS Threshold | Average Delay threshold (s) | Queue threshold (PCU) |
|-----------------------------|-----------------------------|---------------------------------|---------------|-----------------------------|-----------------------|
| ✓                           | ✓                           | Delay                           | 0.85          | 36.00                       | 20.00                 |

### Demand Set Summary

| ID | Scenario name                              | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |

| ID | Name                      | Network flow scaling factor (%) |
|----|---------------------------|---------------------------------|
| A1 | Pearse Road / Cairns Road | 100.000                         |

# Pearse Road / Cairns Road - 2022 Existing Traffic Flows, AM

## Data Errors and Warnings

| Severity | Area              | Item             | Description   |
|----------|-------------------|------------------|---|
| Warning  | Queue percentiles | Analysis Options | Queue percentiles cannot be calculated for signalised junction unless in Lane Simulation mode.      |
| Warning  | Queue variations  | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|-----------------------|--------------------|--------------|
| 1        | untitled | Signalised    |                       | 22.43              | C            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | -17                           | Arm B - Traffic Stream 1     |

## Arms

### Arms

| Arm | Name                       | Description |
|-----|----------------------------|-------------|
| A   | Pearse Road - R287 (North) |             |
| B   | Cairns Road                |             |
| C   | Pearse Road - R287 (South) |             |

### OSCADY Traffic Streams

| Arm | Traffic Stream | Phase | Right turners opposed | Destination arms | Straight move |
|-----|----------------|-------|-----------------------|------------------|---------------|
| A   | 1              | B     |                       | B                | C             |
|     | 2              | A     |                       | C                | C             |
| B   | 1              | C     |                       | A, C             |               |
| C   | 1              | D     |                       | A                | A             |
|     | 2              | E     | ✓                     | B                | A             |

### OSCADY Lanes

| Arm | Traffic Stream | Destination arms | Gradient (%) | Width (m) | Turning radius (m) | Nearside lane | Has bay | Storage for right turners (PCU) |
|-----|----------------|------------------|--------------|-----------|--------------------|---------------|---------|---------------------------------|
| A   | 1              | B                | 0            | 3.00      | 10.00              | ✓             |         |                                 |
|     | 2              | C                | 0            | 3.00      |                    | ✓             |         |                                 |
| B   | 1              | A, C             | 0            | 3.00      | 10.00              | ✓             |         |                                 |
| C   | 1              | A                | 0            | 3.00      |                    | ✓             |         |                                 |
|     | 2              | B                | 0            | 3.00      | 10.00              | ✓             |         | 0.00                            |

### OSCADY Opposition

| Arm | Traffic Stream | Opposed destination | Opposing arm ID | Opposing movements |
|-----|----------------|---------------------|-----------------|--------------------|
| C   | 2              | B                   | A               | B, C               |

## Signal Timings

### Junction 1

| Junction | Sequence to use | Cycle time (s) | Maximum cycle time (s) | Start displacement (s) | End displacement (s) |
|----------|-----------------|----------------|------------------------|------------------------|----------------------|
| 1        | 1               | 71             | 300                    | 1.40                   | 2.90                 |

### Optimisation options

| Junction | Optimise stage lengths | Optimise cycle time | Optimiser demand source | Optimiser message                   |
|----------|------------------------|---------------------|-------------------------|-------------------------------------|
| 1        | ✓                      | ✓                   | Average                 | Timings provide delay minimisation. |

### Phases

| Junction | Phase | Name | Minimum green (s) |
|----------|-------|------|-------------------|
| 1        | A     |      | 7                 |
|          | B     |      | 7                 |
|          | C     |      | 7                 |
|          | D     |      | 7                 |
|          | E     |      | 7                 |
|          | PED   |      | 7                 |

### Library Stages

| Junction | Library Stage | Phases in stage | User stage minimum (s) | Run every N cycles | Probability of running (%) |
|----------|---------------|-----------------|------------------------|--------------------|----------------------------|
| 1        | 1             | D, E            | 1                      |                    |                            |
|          | 2             | A, B, E, D      | 1                      |                    |                            |
|          | 3             | B, C            | 1                      |                    |                            |
|          | 4             | PED             | 1                      |                    |                            |

### Stage Sequences

| Junction | Sequence | Name | Stage IDs  | Stage ends        |
|----------|----------|------|------------|-------------------|
| 1        | 1        |      | 2, 3, 4    | 39, 59, 0         |
|          | 2        |      | 2, 4, 3    | 95, 195, 295      |
|          | 3        |      | 1, 2, 3, 4 | 67, 140, 218, 295 |
|          | 4        |      | 1, 2, 4, 3 | 67, 140, 218, 295 |
|          | 5        |      | 1, 3, 2, 4 | 70, 145, 220, 295 |
|          | 6        |      | 1, 3, 4, 2 | 67, 145, 223, 0   |
|          | 7        |      | 1, 4, 2, 3 | 70, 145, 220, 295 |
|          | 8        |      | 1, 4, 3, 2 | 67, 145, 223, 0   |

### Intergreen Matrix for Junction 1

| From | To |   |   |   |   |   |     |
|------|----|---|---|---|---|---|-----|
|      |    | A | B | C | D | E | PED |
| A    |    |   | 5 |   |   | 5 |     |
| B    |    |   |   |   |   | 5 |     |
| C    | 5  |   |   | 5 | 5 | 5 |     |
| D    |    |   | 5 |   |   | 5 |     |
| E    |    |   | 5 |   |   | 5 |     |
| PED  | 5  | 5 | 5 | 5 | 5 | 5 |     |

### Interstage Matrix for Junction 1

| From | To |   |   |   |   |
|------|----|---|---|---|---|
|      |    | 1 | 2 | 3 | 4 |
| 1    | 0  | 0 | 5 | 5 |   |
| 2    | 0  | 0 | 5 | 5 |   |
| 3    | 5  | 5 | 0 | 5 |   |
| 4    | 5  | 5 | 5 | 0 |   |

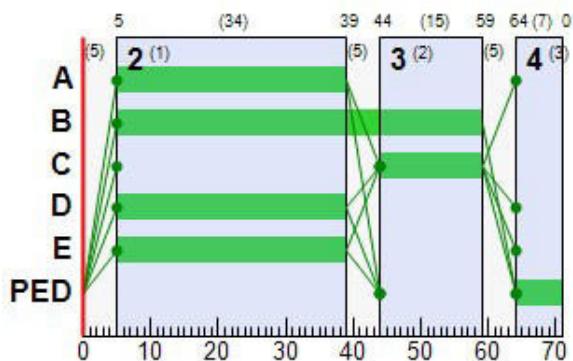

## Resultant Stages

| Junction | Resultant Stage | Library Stage ID | Phases in this stage | Stage start (s) | Stage end (s) | Stage duration (s) | User stage minimum (s) | Stage minimum (s) |
|----------|-----------------|------------------|----------------------|-----------------|---------------|--------------------|------------------------|-------------------|
| 1        | 1               | 2                | A,B,E,D              | 5               | 39            | 34                 | 1                      | 7                 |
|          | 2               | 3                | B,C                  | 44              | 59            | 15                 | 1                      | 7                 |
|          | 3               | 4                | PED                  | 64              | 0             | 7                  | 1                      | 7                 |

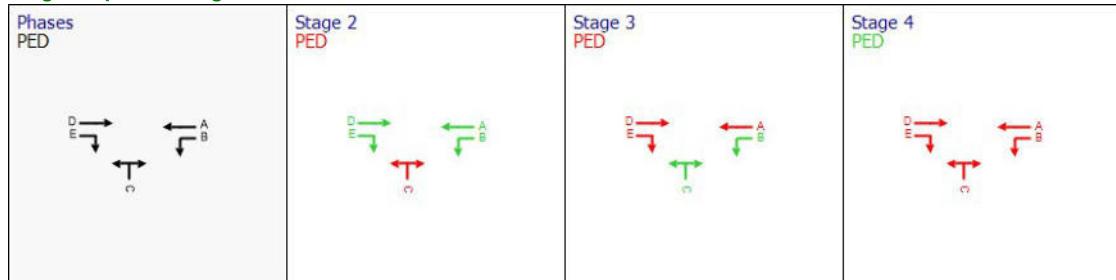

## Resultant Phase Green Periods

| Junction | Phase | Green period | Start time (s) | End time (s) | Duration (s) |
|----------|-------|--------------|----------------|--------------|--------------|
| 1        | A     | 1            | 5              | 39           | 34           |
|          | B     | 1            | 5              | 59           | 54           |
|          | C     | 1            | 44             | 59           | 15           |
|          | D     | 1            | 5              | 39           | 34           |
|          | E     | 1            | 5              | 39           | 34           |
|          | PED   | 1            | 64             | 0            | 7            |

## Phase Timings Diagram for Junction 1

## Stage Sequence Diagram for Junction 1

## Traffic Demand

### Demand Set Details

| ID | Scenario name               | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|-----------------------------|------------------|----------------------|--------------------|---------------------|---------------------------|
| D1 | 2022 Existing Traffic Flows | AM               | ONE HOUR             | 08:15              | 09:45               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 437                     | 100.000            |
| B   |            | ✓            | 281                     | 100.000            |
| C   |            | ✓            | 645                     | 100.000            |

## Origin-Destination Data

Demand (PCU/hr)

|      | To |     |    |     |
|------|----|-----|----|-----|
|      |    | A   | B  | C   |
| From | A  | 0   | 84 | 353 |
|      | B  | 225 | 0  | 56  |
|      | C  | 630 | 15 | 0   |

## Vehicle Mix

Heavy Vehicle Percentages

|      | To |   |   |   |
|------|----|---|---|---|
|      |    | A | B | C |
| From | A  | 0 | 0 | 1 |
|      | B  | 0 | 0 | 0 |
|      | C  | 1 | 0 | 0 |

## Results

### Results Summary for whole modelled period

| Arm | Max DOS | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|-----|---------|---------------|-----------------|---------------------------------|---------|
| A   | 0.41    | 10.62         | 4.4             | ?                               | B       |
| B   | 0.80    | 47.17         | 6.5             | ?                               | D       |
| C   | 0.72    | 19.65         | 8.1             | ?                               | B       |

### Main Results for each time segment

#### 08:15 - 08:30

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |
|-----|----------------|-----------------------|-------------------------------------|--------------------------|----------|-------------------|-------|---------------------|-----------------|-----------|-----------------------------|
| A   | 1              | 63                    | 1665                                | 55.50                    | 0.00     | 1302              | 0.049 | 62                  | 0.3             | 1.843     | A                           |
|     | 2              | 266                   | 1915                                | 35.50                    | 0.00     | 958               | 0.278 | 255                 | 2.7             | 11.176    | B                           |
| B   | 1              | 212                   | 1665                                | 16.50                    | 0.00     | 387               | 0.547 | 197                 | 3.6             | 30.390    | C                           |
| C   | 1              | 474                   | 1915                                | 35.50                    | 0.00     | 958               | 0.495 | 454                 | 5.0             | 14.001    | B                           |
|     | 2              | 11                    | 862                                 | 35.50                    | 0.00     | 431               | 0.026 | 11                  | 0.1             | 9.128     | A                           |

#### 08:30 - 08:45

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |
|-----|----------------|-----------------------|-------------------------------------|--------------------------|----------|-------------------|-------|---------------------|-----------------|-----------|-----------------------------|

# Pearse Road / Cairns Road - 2022 Existing Traffic Flows, PM

## Data Errors and Warnings

| Severity | Area              | Item             | Description   |
|----------|-------------------|------------------|---|
| Warning  | Queue percentiles | Analysis Options | Queue percentiles cannot be calculated for signalised junction unless in Lane Simulation mode.      |
| Warning  | Queue variations  | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|-----------------------|--------------------|--------------|
| 1        | untitled | Signalised    |                       | 13.82              | B            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | -100                          | Arm B - Traffic Stream 1     |

## Traffic Demand

### Demand Set Details

| ID | Scenario name               | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|-----------------------------|------------------|----------------------|--------------------|---------------------|---------------------------|
| D2 | 2022 Existing Traffic Flows | PM               | ONE HOUR             | 17:00              | 18:30               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 885                     | 100.000            |
| B   |            | ✓            | 130                     | 100.000            |
| C   |            | ✓            | 556                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From |   | To  |     |     |
|------|---|-----|-----|-----|
|      |   | A   | B   | C   |
|      | A | 0   | 157 | 728 |
|      | B | 96  | 0   | 34  |
|      | C | 493 | 63  | 0   |

## Vehicle Mix

### Heavy Vehicle Percentages

| From |   | To |   |   |
|------|---|----|---|---|
|      |   | A  | B | C |
|      | A | 0  | 0 | 1 |
|      | B | 0  | 0 | 0 |
|      | C | 1  | 0 | 0 |

## Results

### Results Summary for whole modelled period

| Arm | Max DOS | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|-----|---------|---------------|-----------------|---------------------------------|---------|
| A   | 0.61    | 9.34          | 8.3             | ?                               | A       |
| B   | 0.69    | 65.72         | 4.4             | ?                               | E       |
| C   | 0.41    | 8.81          | 5.7             | ?                               | A       |

### Main Results for each time segment

17:00 - 17:15

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |
|-----|----------------|-----------------------|-------------------------------------|--------------------------|----------|-------------------|-------|---------------------|-----------------|-----------|-----------------------------|
| A   | 1              | 118                   | 1665                                | 85.50                    | 0.00     | 1410              | 0.084 | 116                 | 0.5             | 1.420     | A                           |
|     | 2              | 548                   | 1915                                | 69.50                    | 0.00     | 1318              | 0.416 | 528                 | 5.0             | 8.052     | A                           |
| B   | 1              | 98                    | 1665                                | 12.50                    | 0.00     | 206               | 0.475 | 87                  | 2.7             | 50.139    | D                           |
| C   | 1              | 371                   | 1915                                | 69.50                    | 0.00     | 1318              | 0.282 | 358                 | 3.3             | 6.740     | A                           |

# Pearse Road / Cairns Road - 2023 Year of Opening With Development, AM

## Data Errors and Warnings

| Severity | Area              | Item             | Description   |
|----------|-------------------|------------------|---|
| Warning  | Queue percentiles | Analysis Options | Queue percentiles cannot be calculated for signalised junction unless in Lane Simulation mode.      |
| Warning  | Queue variations  | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|-----------------------|--------------------|--------------|
| 1        | untitled | Signalised    |                       | 27.35              | C            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | -22                           | Arm B - Traffic Stream 1     |

## Traffic Demand

### Demand Set Details

| ID | Scenario name                         | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|---------------------------------------|------------------|----------------------|--------------------|---------------------|---------------------------|
| D3 | 2023 Year of Opening With Development | AM               | ONE HOUR             | 08:15              | 09:45               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 452                     | 100.000            |
| B   |            | ✓            | 307                     | 100.000            |
| C   |            | ✓            | 654                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From | To  |    |     |
|------|-----|----|-----|
|      | A   | B  | C   |
| A    | 0   | 96 | 356 |
| B    | 248 | 0  | 59  |
| C    | 636 | 18 | 0   |

## Vehicle Mix

### Heavy Vehicle Percentages

| From | To |   |   |
|------|----|---|---|
|      | A  | B | C |
| A    | 0  | 0 | 1 |
| B    | 0  | 0 | 0 |
| C    | 1  | 0 | 0 |

## Results

### Results Summary for whole modelled period

| Arm | Max DOS | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|-----|---------|---------------|-----------------|---------------------------------|---------|
| A   | 0.43    | 10.56         | 4.3             | ?                               | B       |
| B   | 0.90    | 64.88         | 8.4             | ?                               | E       |
| C   | 0.77    | 21.34         | 8.2             | ?                               | C       |

### Main Results for each time segment

08:15 - 08:30

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |
|-----|----------------|-----------------------|-------------------------------------|--------------------------|----------|-------------------|-------|---------------------|-----------------|-----------|-----------------------------|
| A   | 1              | 72                    | 1665                                | 48.50                    | 0.00     | 1262              | 0.057 | 71                  | 0.3             | 2.066     | A                           |
|     | 2              | 268                   | 1915                                | 30.50                    | 0.00     | 913               | 0.294 | 258                 | 2.6             | 11.183    | B                           |
| B   | 1              | 231                   | 1665                                | 14.50                    | 0.00     | 377               | 0.613 | 216                 | 3.7             | 30.693    | C                           |

# Pearse Road / Cairns Road - 2023 Year of Opening With Development, PM

## Data Errors and Warnings

| Severity | Area              | Item             | Description   |
|----------|-------------------|------------------|---|
| Warning  | Queue percentiles | Analysis Options | Queue percentiles cannot be calculated for signalised junction unless in Lane Simulation mode.      |
| Warning  | Queue variations  | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|-----------------------|--------------------|--------------|
| 1        | untitled | Signalised    |                       | 15.13              | B            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | -100                          | Arm B - Traffic Stream 1     |

## Traffic Demand

### Demand Set Details

| ID | Scenario name                         | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|---------------------------------------|------------------|----------------------|--------------------|---------------------|---------------------------|
| D4 | 2023 Year of Opening With Development | PM               | ONE HOUR             | 17:00              | 18:30               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 910                     | 100.000            |
| B   |            | ✓            | 145                     | 100.000            |
| C   |            | ✓            | 570                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From |   | To  |     |     |
|------|---|-----|-----|-----|
|      |   | A   | B   | C   |
|      | A | 0   | 175 | 735 |
|      | B | 107 | 0   | 38  |
|      | C | 498 | 72  | 0   |

## Vehicle Mix

### Heavy Vehicle Percentages

| From |   | To |   |   |
|------|---|----|---|---|
|      |   | A  | B | C |
|      | A | 0  | 0 | 1 |
|      | B | 0  | 0 | 0 |
|      | C | 1  | 0 | 0 |

## Results

### Results Summary for whole modelled period

| Arm | Max DOS | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|-----|---------|---------------|-----------------|---------------------------------|---------|
| A   | 0.62    | 9.63          | 8.5             | ?                               | A       |
| B   | 0.75    | 70.75         | 5.1             | ?                               | E       |
| C   | 0.48    | 9.77          | 5.9             | ?                               | A       |

### Main Results for each time segment

17:00 - 17:15

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |
|-----|----------------|-----------------------|-------------------------------------|--------------------------|----------|-------------------|-------|---------------------|-----------------|-----------|-----------------------------|
| A   | 1              | 132                   | 1665                                | 82.50                    | 0.00     | 1402              | 0.094 | 129                 | 0.6             | 1.491     | A                           |
|     | 2              | 553                   | 1915                                | 66.50                    | 0.00     | 1299              | 0.426 | 533                 | 5.0             | 8.356     | A                           |
| B   | 1              | 109                   | 1665                                | 12.50                    | 0.00     | 212               | 0.514 | 98                  | 2.9             | 49.956    | D                           |
| C   | 1              | 375                   | 1915                                | 66.50                    | 0.00     | 1299              | 0.289 | 362                 | 3.4             | 6.973     | A                           |
|     | 2              | 54                    | 488                                 | 66.50                    | 0.00     | 331               | 0.164 | 52                  | 0.5             | 6.963     | A                           |

17:15 - 17:30

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |
|-----|----------------|-----------------------|-------------------------------------|--------------------------|----------|-------------------|-------|---------------------|-----------------|-----------|-----------------------------|

## Data Errors and Warnings

| Severity | Area              | Item             | Description   |
|----------|-------------------|------------------|---|
| Warning  | Queue percentiles | Analysis Options | Queue percentiles cannot be calculated for signalised junction unless in Lane Simulation mode.      |
| Warning  | Queue variations  | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|-----------------------|--------------------|--------------|
| 1        | untitled | Signalised    |                       | 26.09              | C            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | -18                           | Arm B - Traffic Stream 1     |

## Traffic Demand

### Demand Set Details

| ID | Scenario name                             | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|---|------------------|----------------------|--------------------|---------------------|---------------------------|
| D5 | 2028 Year of Opening + 5 With Development | AM               | ONE HOUR             | 08:15              | 09:45               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 479                     | 100.000            |
| B   |            | ✓            | 327                     | 100.000            |
| C   |            | ✓            | 692                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From |   | To  |     |     |
|------|---|-----|-----|-----|
|      |   | A   | B   | C   |
|      | A | 0   | 101 | 378 |
|      | B | 261 | 0   | 66  |
|      | C | 674 | 18  | 0   |

## Vehicle Mix

### Heavy Vehicle Percentages

| From |   | To |   |   |
|------|---|----|---|---|
|      |   | A  | B | C |
|      | A | 0  | 0 | 1 |
|      | B | 0  | 0 | 0 |
|      | C | 1  | 0 | 0 |

## Results

### Results Summary for whole modelled period

| Arm | Max DOS | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|-----|---------|---------------|-----------------|---------------------------------|---------|
| A   | 0.45    | 11.85         | 5.2             | ?                               | B       |
| B   | 0.83    | 49.62         | 7.8             | ?                               | D       |
| C   | 0.80    | 24.84         | 10.0            | ?                               | C       |

### Main Results for each time segment

08:15 - 08:30

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |
|-----|----------------|-----------------------|-------------------------------------|--------------------------|----------|-------------------|-------|---------------------|-----------------|-----------|-----------------------------|
| A   | 1              | 76                    | 1665                                | 59.50                    | 0.00     | 1321              | 0.058 | 75                  | 0.3             | 1.778     | A                           |
|     | 2              | 285                   | 1915                                | 36.50                    | 0.00     | 932               | 0.305 | 272                 | 3.1             | 12.630    | B                           |
| B   | 1              | 246                   | 1665                                | 19.50                    | 0.00     | 433               | 0.569 | 229                 | 4.2             | 30.376    | C                           |
| C   | 1              | 507                   | 1915                                | 36.50                    | 0.00     | 932               | 0.544 | 484                 | 5.8             | 16.188    | B                           |
|     | 2              | 14                    | 785                                 | 36.50                    | 0.00     | 382               | 0.035 | 13                  | 0.1             | 10.263    | B                           |

08:30 - 08:45

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |

# Pearse Road / Cairns Road - 2028 Year of Opening + 5 With Development, PM

## Data Errors and Warnings

| Severity | Area              | Item             | Description   |
|----------|-------------------|------------------|---|
| Warning  | Queue percentiles | Analysis Options | Queue percentiles cannot be calculated for signalised junction unless in Lane Simulation mode.      |
| Warning  | Queue variations  | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|-----------------------|--------------------|--------------|
| 1        | untitled | Signalised    |                       | 16.12              | B            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | -100                          | Arm B - Traffic Stream 1     |

## Traffic Demand

### Demand Set Details

| ID | Scenario name                             | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|---|------------------|----------------------|--------------------|---------------------|---------------------------|
| D6 | 2028 Year of Opening + 5 With Development | PM               | ONE HOUR             | 17:00              | 18:30               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 966                     | 100.000            |
| B   |            | ✓            | 151                     | 100.000            |
| C   |            | ✓            | 604                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From |   | To  |     |     |
|------|---|-----|-----|-----|
|      |   | A   | B   | C   |
|      | A | 0   | 187 | 779 |
|      | B | 112 | 0   | 39  |
|      | C | 528 | 76  | 0   |

## Vehicle Mix

### Heavy Vehicle Percentages

| From |   | To |   |   |
|------|---|----|---|---|
|      |   | A  | B | C |
|      | A | 0  | 0 | 1 |
|      | B | 0  | 0 | 0 |
|      | C | 1  | 0 | 0 |

## Results

### Results Summary for whole modelled period

| Arm | Max DOS | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|-----|---------|---------------|-----------------|---------------------------------|---------|
| A   | 0.66    | 10.46         | 9.4             | ?                               | B       |
| B   | 0.75    | 71.52         | 5.4             | ?                               | E       |
| C   | 0.58    | 11.33         | 6.7             | ?                               | B       |

### Main Results for each time segment

17:00 - 17:15

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |

# Pearse Road / Cairns Road - 2038 Year of Opening + 15 With Development, AM

## Data Errors and Warnings

| Severity | Area              | Item             | Description   |
|----------|-------------------|------------------|---|
| Warning  | Queue percentiles | Analysis Options | Queue percentiles cannot be calculated for signalised junction unless in Lane Simulation mode.      |
| Warning  | Queue variations  | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|-----------------------|--------------------|--------------|
| 1        | untitled | Signalised    |                       | 29.35              | C            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | -23                           | Arm B - Traffic Stream 1     |

## Traffic Demand

### Demand Set Details

| ID | Scenario name                              | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|--|------------------|----------------------|--------------------|---------------------|---------------------------|
| D7 | 2038 Year of Opening + 15 With Development | AM               | ONE HOUR             | 08:15              | 09:45               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 505                     | 100.000            |
| B   |            | ✓            | 347                     | 100.000            |
| C   |            | ✓            | 731                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From |   | To  |     |     |
|------|---|-----|-----|-----|
|      |   | A   | B   | C   |
|      | A | 0   | 106 | 399 |
|      | B | 275 | 0   | 72  |
|      | C | 712 | 19  | 0   |

## Vehicle Mix

### Heavy Vehicle Percentages

| From |   | To |   |   |
|------|---|----|---|---|
|      |   | A  | B | C |
|      | A | 0  | 0 | 1 |
|      | B | 0  | 0 | 0 |
|      | C | 1  | 0 | 0 |

## Results

### Results Summary for whole modelled period

| Arm | Max DOS | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|-----|---------|---------------|-----------------|---------------------------------|---------|
| A   | 0.46    | 12.22         | 5.6             | ?                               | B       |
| B   | 0.87    | 58.06         | 9.2             | ?                               | E       |
| C   | 0.83    | 27.55         | 11.2            | ?                               | C       |

### Main Results for each time segment

08:15 - 08:30

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |

# Pearse Road / Cairns Road - 2038 Year of Opening + 15 With Development, PM

## Data Errors and Warnings

| Severity | Area              | Item             | Description   |
|----------|-------------------|------------------|---|
| Warning  | Queue percentiles | Analysis Options | Queue percentiles cannot be calculated for signalised junction unless in Lane Simulation mode.      |
| Warning  | Queue variations  | Analysis Options | Queue percentiles may be unreliable if the mean queue in any time segment is very low or very high. |

## Junction Network

### Junctions

| Junction | Name     | Junction type | Use circulating lanes | Junction Delay (s) | Junction LOS |
|----------|----------|---------------|-----------------------|--------------------|--------------|
| 1        | untitled | Signalised    |                       | 17.47              | B            |

### Junction Network Options

| Driving side | Lighting       | Network residual capacity (%) | First arm reaching threshold |
|--------------|----------------|-------------------------------|------------------------------|
| Left         | Normal/unknown | -100                          | Arm B - Traffic Stream 1     |

## Traffic Demand

### Demand Set Details

| ID | Scenario name                              | Time Period name | Traffic profile type | Start time (HH:mm) | Finish time (HH:mm) | Time segment length (min) |
|----|--|------------------|----------------------|--------------------|---------------------|---------------------------|
| D8 | 2038 Year of Opening + 15 With Development | PM               | ONE HOUR             | 17:00              | 18:30               | 15                        |

| Vehicle mix source | PCU Factor for a HV (PCU) |
|--------------------|---------------------------|
| HV Percentages     | 2.00                      |

### Demand overview (Traffic)

| Arm | Linked arm | Use O-D data | Average Demand (PCU/hr) | Scaling Factor (%) |
|-----|------------|--------------|-------------------------|--------------------|
| A   |            | ✓            | 1018                    | 100.000            |
| B   |            | ✓            | 154                     | 100.000            |
| C   |            | ✓            | 636                     | 100.000            |

## Origin-Destination Data

### Demand (PCU/hr)

| From |   | To  |     |     |
|------|---|-----|-----|-----|
|      |   | A   | B   | C   |
|      | A | 0   | 196 | 822 |
|      | B | 112 | 0   | 42  |
|      | C | 557 | 79  | 0   |

## Vehicle Mix

### Heavy Vehicle Percentages

| From |   | To |   |   |
|------|---|----|---|---|
|      |   | A  | B | C |
|      | A | 0  | 0 | 1 |
|      | B | 0  | 0 | 0 |
|      | C | 1  | 0 | 0 |

## Results

### Results Summary for whole modelled period

| Arm | Max DOS | Max Delay (s) | Max Queue (PCU) | Max 95th percentile Queue (PCU) | Max LOS |
|-----|---------|---------------|-----------------|---------------------------------|---------|
| A   | 0.68    | 10.89         | 10.0            | ?                               | B       |
| B   | 0.79    | 80.20         | 5.9             | ?                               | F       |
| C   | 0.66    | 12.80         | 7.3             | ?                               | B       |

### Main Results for each time segment

#### 17:00 - 17:15

| Arm | Traffic Stream | Total Demand (PCU/hr) | Calculated saturation flow (PCU/hr) | Effective green time (s) | NEEG (s) | Capacity (PCU/hr) | DOS   | Throughput (PCU/hr) | End queue (PCU) | Delay (s) | Signalised level of service |
|-----|----------------|-----------------------|-------------------------------------|--------------------------|----------|-------------------|-------|---------------------|-----------------|-----------|-----------------------------|
| A   | 1              | 148                   | 1665                                | 89.50                    | 0.00     | 1419              | 0.104 | 145                 | 0.6             | 1.432     | A                           |
|     | 2              | 619                   | 1915                                | 72.50                    | 0.00     | 1322              | 0.468 | 596                 | 5.8             | 8.869     | A                           |
| B   | 1              | 116                   | 1665                                | 13.50                    | 0.00     | 214               | 0.542 | 103                 | 3.3             | 53.872    | D                           |
